

LUNAR RESIDENTIAL AUTHORITY
OFFICE OF SURFACE GOVERNANCE & CRATER STANDARDS

LUNAR RESIDENTIAL CHARTER

*Including All Amendments, Addenda, Footnotes,
Supplementary Dust Drift Tables, the Full Howling Ordinance,
and the Register of Pre-Existing Historic Surface Structures*

DOCUMENT REFERENCE: LRA-CHARTER-2088-REV.9
4,200 Pages (Authorized) · Volume I of XII · Ratified Lunar Cycle 1, Day 1

Moon Homeowners Association

Sea of Tranquility, Sector Alpha, The Moon
moonhoa.com · board@moonhoa.com

Table of Contents

This is Volume I. Volumes II through XII contain the Supplementary Dust Drift Tables, the complete Howling Ordinance Jurisprudence, the full Register of Pre-Existing Historic Surface Structures, and approximately four hundred pages of footnotes that reference other footnotes. All volumes are required reading. The Board is aware that this claim is not independently verifiable.

Table of Contents	2
Preface.....	8
Notice to Residents	9
How to Use This Charter	10
PART I — Foundational Principles & Jurisdiction	11
§ 1.1 Name, Seal, and Official Motto	11
§ 1.2 Territorial Boundaries & Airspace Claims	11
§ 1.3 Statement of Values	11
§ 1.4 Definitions.....	12
PART II — Residency & Membership.....	14
§ 2.1 Eligibility for Residency.....	14
§ 2.2 Application Procedures	14
§ 2.3 The Oath of Lunar Civic Responsibility	15
§ 2.4 Transfer, Subletting & Crater-Share Arrangements.....	15
§ 2.5 Resident Standing & Good Standing Requirements.....	16
§ 2.6 Resident Directory & Privacy	16
§ 2.7 Residency for Minors & Dependents	16
PART III — Property Standards & Surface Maintenance	17
§ 3.1 Albedo Compliance	17
§ 3.2 Dust Containment & Drift Liability	17
§ 3.3 Structural Regulations	18
§ 3.4 Lawn Ornaments & Exterior Decoration	18
§ 3.5 Crater Modification & Landscaping	19
§ 3.6 Boundary Markers & Fencing	19
§ 3.7 Signage Standards	20
§ 3.8 Approved Exterior Paint & Material Palette.....	20
§ 3.9 Reflectivity Assistance Programme	20
PART IV — Behavioural Standards	22
§ 4.1 Noise Ordinance & Howling Regulations.....	22
§ 4.2 Rocket Landing Protocols	22

§ 4.3 Circadian Compliance	23
§ 4.4 Relations with Non-Association Jurisdictions	23
§ 4.5 Prohibited Conduct	23
§ 4.6 Vehicle & Rover Parking Standards	24
§ 4.7 Pets, Companion Organisms & Registered Life Forms	24
§ 4.8 Emergency Powers	25
PART V — Governance & Board Authority	26
§ 5.1 Board Composition & Election	26
§ 5.2 Powers of the Board.....	26
§ 5.3 Meeting Procedures.....	27
§ 5.4 Appeals & the Tribunal.....	27
§ 5.5 Board Member Eligibility, Conflicts & Recusal	28
§ 5.6 Removal of a Board Member.....	28
§ 5.7 Board Compensation & Expense Reimbursement.....	28
PART VI — Fees, Fines & Enforcement	30
§ 6.1 Annual HOA Dues.....	30
§ 6.2 Schedule of Fines.....	30
§ 6.3 Enforcement Procedures.....	31
§ 6.4 The Strongly Worded Letter Protocol.....	31
§ 6.5 Reserve Components & the Reserve Study	31
§ 6.6 Special Assessments	32
§ 6.7 Collections & Delinquency Policy.....	32
§ 6.8 Fine Appeals & Payment Plans	33
§ 6.9 Compliance Rebate Programme	33
PART VII — Amenities, Events & Community Life	34
§ 7.1 Community Amenities	34
The Zero-Gravity Swimming Pool.....	34
The Moonwalk Trail	34
The Solar Tanning Deck	34
The Document Processing Centre	34
The Legacy Overlook	34
§ 7.2 Mandatory Community Events	34
§ 7.3 The Full Moon Party: Rules & Expectations	35
§ 7.4 Guest & Visitor Policy	35
§ 7.5 Short-Term & Heritage-Tourism Occupancy.....	36
§ 7.6 Holiday Decoration Standards	36
§ 7.7 New Resident Welcome Packet	36

§ 7.8 Amenity Reservation & Booking	37
PART IX — Legacy Equipment, Historic Sites & Pre-Association Infrastructure	38
§ 9.1 Background & Jurisdictional History	38
§ 9.2 Register of Pre-Existing Historic Surface Structures	38
§ 9.3 The Legacy Structure Grandfather Clause	39
§ 9.4 Legacy Equipment & Communications Carve-Outs	40
§ 9.5 Correspondence with Pre-Association Entities	40
§ 9.6 Application of the Junk Vehicle Ordinance to Derelict Landers & Rovers	41
§ 9.7 New Arrivals: Registration Requirements for Post-Incorporation Landings	41
§ 9.8 The Lunar Heritage Preservation Accord	41
§ 9.9 Heritage Tourism & Commercial Filming Restrictions	42
§ 9.10 Artifact Recovery & the No-Removal Policy	42
§ 9.11 A Brief History of Activity Prior to Incorporation	42
§ 9.12 Future Discoveries & Newly Identified Sites	43
PART X — Environmental & Surface Conservation Standards	44
§ 10.1 Regolith Conservation & Erosion Control	44
§ 10.2 Light Pollution & Earthshine Standards	44
§ 10.3 Seismic & Moonquake Preparedness	44
§ 10.4 Solar Flare Shelter Requirements	44
§ 10.5 Micrometeorite & Space Debris Liability	44
§ 10.6 Waste Management & the Toss Zone Legacy Designation	45
§ 10.7 Noise from Environmental & Life Support Systems	45
PART XI — Utilities & Infrastructure	46
§ 11.1 Oxygen Utility Service	46
§ 11.2 Water Ice Claims & Polar Resource Rights	46
§ 11.3 Power Grid & Solar Easements	46
§ 11.4 Communications Relay Easements	46
§ 11.5 Utility Easement Encroachment	47
§ 11.6 Broadband & Data Relay Service Levels	47
§ 11.7 Utility Billing Disputes	47
PART XII — Committees & Subcommittees	48
§ 12.1 Architectural Review Committee	48
§ 12.2 Aesthetic Review Committee	48
§ 12.3 Legacy Equipment Preservation Subcommittee	48
§ 12.4 Craterscaping Subcommittee	48
§ 12.5 Social Events Committee	48
§ 12.6 Audit & Finance Committee	48

§ 12.7 Nominating Committee	48
§ 12.8 Grievance & Ethics Committee	49
§ 12.9 Committee Meeting Cadence.....	49
PART XIII — Insurance, Liability & Risk Management	50
§ 13.1 Mandatory Individual Coverage	50
§ 13.2 Association Master Policy	50
§ 13.3 EVA & Contractor Liability	50
§ 13.4 Indemnification	50
§ 13.5 Claims Involving Legacy Structures	50
§ 13.6 Claims Arising from Committee Activity	51
§ 13.7 Environmental Risk Disclosure	51
PART XIV — Dispute Resolution & Neighbour Relations	52
§ 14.1 Mediation	52
§ 14.2 Neighbour Complaint Procedures.....	52
§ 14.3 The Good Neighbour Policy.....	52
§ 14.4 Anti-Retaliation Provision.....	52
§ 14.5 Escalation to Multi-Association Arbitration	52
§ 14.6 Resident-to-Resident Contracts & Private Agreements	53
§ 14.7 Resident Advocate Programme	53

Resolution 2094-R-09: Recognising the Register of Pre-Existing Historic Surface Structures	100
Resolution 2091-R-14: Establishing the Compliance Rebate Programme	100
Appendix Y — Sample New Resident Orientation Quiz.....	101
Appendix Z — Acknowledgements & Drafting Notes	102
A Closing Case Study.....	102
Appendix AA — Sample Full Moon Party Programme	103
A Note on Attendance Enforcement	103
Appendix BB — Excerpt from Volume XII: Footnotes to Footnotes (Consolidated).....	104
A Final Cross-Reference.....	104
Appendix CC — Quick Reference: Most-Cited Sections	105
Appendix DD — A Word on Volume II Through XII	106
Appendix F — For Residents Who Read This Far	107

Preface

This Charter was conceived following the Great Regolith Incident of 2086, in which a single unchecked dust drift contaminated fourteen adjacent craters, three oxygen gardens, and one resident's unobstructed view of Earth during what she described in her formal complaint as "a moment I will not get back."

The Board convened an emergency session lasting eleven months. What follows is the result.

The Lunar Residential Charter is the supreme governing document of all residential life on the Moon's near side. It supersedes all prior agreements, verbal understandings, handshakes exchanged in vacuum (legally ineffective regardless of intent), and the informal understanding known as the Founders' Crater Pact of 2084, which the Board has never formally recognised and does not intend to.

Residents are encouraged to read this document in full. Residents are also encouraged to take reasonable meal breaks, remain hydrated, and maintain a positive altitude about the process. The document is long. Lunar governance is, by any honest accounting, more complicated than anyone involved anticipated at the outset. These are simply facts.

This edition (Revision 9) represents the most significant expansion of the Charter since its original ratification. It incorporates eight new Parts addressing legacy infrastructure, environmental conservation, utilities, committee structure, insurance, dispute resolution, and digital community standards — reflecting both the growth of the Association and several matters the Board was previously content to leave unaddressed.

The Board thanks residents for their compliance. The Board expects residents' compliance. The Board will know if residents do not comply.

Signed,

Chairperson Adaeze Okafor, LRA Board of Directors

Deputy Director of Surface Standards, Tobias Renn

Keeper of the Dust Drift Ledger, Position Currently Vacant

Notice to Residents

By inhabiting, leasing, or otherwise occupying any lunar property within Moon HOA jurisdiction, you are deemed to have read, understood, and irrevocably agreed to every provision contained within this document, including Appendix Q (Dust Drift Liability Matrices, Volume IV), Appendix G (Approved Lunar Holiday Schedule), and the addendum addressing legacy exploration equipment. Ignorance is not a defence. Neither is distance.

Residents occasionally ask whether "irrevocably agreed" can be revoked. It cannot. This has been asked before. The answer has not changed.

How to Use This Charter

This Volume is organised in sixteen Parts, each addressing a distinct area of Association life, followed by a series of Appendices containing schedules, registers, specimens, and reference material too granular to sit comfortably within the Parts themselves.

Residents seeking a specific rule are encouraged to consult the Table of Contents or the Cross-Reference Index at Appendix K before reading sequentially. Residents seeking to understand the Association's general philosophy of governance are encouraged to read Part I and the Statement of Values at § 1.3, which the Board considers a reasonably honest summary of its priorities.

Section numbers follow a consistent Part.Section.Subsection convention (e.g., § 3.2.2 refers to Part III, Section 2, Subsection 2). Cross-references to material outside this Volume specify the Volume in question; references without a specified Volume refer to this Volume.

A note on tone: this Charter is, by design, thorough to the point of occasional self-awareness about its own thoroughness. The Board considers this preferable to the alternative, having tried the alternative, briefly, in an earlier and considerably shorter draft that residents found "unhelpfully vague" in their feedback on Revision 1.

PART I — Foundational Principles & Jurisdiction

§ 1.1 Name, Seal, and Official Motto

1.1.1 The full and legally binding name of this organisation is the Moon Homeowners Association, operating under the administrative authority of the Lunar Residential Authority (hereafter "the LRA," "the Authority," "the Board," or, informally, "the people who sent you that letter.")

1.1.2 The official seal of the Moon HOA depicts the lunar crescent, two crossed brooms, and the motto of the Association encircling the design. The motto is: "Order. Albedo. Compliance."

1.1.3 A secondary, unofficial motto, "Somebody Has To Keep This Place Tidy," appears on internal stationery and has no legal standing but is deeply felt.

1.1.4 The seal may not be reproduced, parodied, embossed onto personal crockery, projected onto the lunar surface, or used to intimidate non-residents without written authorisation from the Board. Authorisation is rarely granted, and the Board has stopped explaining why.

§ 1.2 Territorial Boundaries & Airspace Claims

1.2.1 The jurisdiction of the Moon HOA extends across the Near Side of the Moon, bounded to the north by Mare Frigoris, to the south by the South Pole–Aitken Basin outer ridge (excluding the Basin itself, which the Board has been "looking into" since 2086), to the east by Mare Crisium, and to the west by Oceanus Procellarum.

1.2.2 The Moon HOA asserts nominal jurisdiction over the Far Side, though enforcement there remains pending. Residents on the Far Side are advised to conduct themselves as though monitored. They are probably not being monitored. The Board considers this a distinction without a difference.

1.2.3 Airspace jurisdiction extends from the lunar surface to an altitude of 50 kilometres. Above 50 kilometres, the Board acknowledges it has no legal claim but reserves the right to disapprove of what it observes up there.

1.2.4 The Moon HOA does not claim jurisdiction over Earth. This has been confirmed in writing, twice, at the request of an Earth-based counsel who did not find the first confirmation sufficiently formal.

1.2.5 Where jurisdiction over a given structure, vehicle, or object is disputed between the Association and a non-member entity (including but not limited to national space agencies and private aerospace companies), the dispute resolution procedures of Part XIV apply, without prejudice to the Board's ability to send correspondence regardless of the outcome.

§ 1.3 Statement of Values

The Moon HOA is guided by the following core values, listed in descending order of priority:

- **Surface Integrity:** The lunar surface shall be maintained in a condition reflective of the dignity, discipline, and collective taste of its residents. "Taste" is defined by the Board.
- **Compliance:** All residents shall comply with all provisions of this Charter at all times, including provisions they have not yet read, provisions that are internally inconsistent, and provisions that appear only in the footnotes of other footnotes.
- **Community:** Residents are encouraged to view their fellow residents with warmth, neighbourliness, and the quiet, watchful attention of someone who intends to file a dust drift report if anything seems off.
- **Transparency:** The Board will communicate with residents in a timely, clear, and accessible manner. This value is aspirational and the Board wants credit for including it anyway.
- **Proportionality:** Fines shall be proportionate to violations. The Board acknowledges this has not always been the case historically and invites no further comment on the matter.
- **Historical Stewardship:** The Association recognises that portions of its jurisdiction predate the Association itself by well over a century, and undertakes to preserve those sites even where doing so conflicts with the Association's own aesthetic standards.

§ 1.4 Definitions

For the purposes of this Charter, the following definitions apply. Where terms are not defined herein, they are defined in Volume IV, which itself references a glossary in Volume IX. Both are required reading. A consolidated Glossary appears at Appendix E of this Volume for residents unable to locate Volumes IV or IX.

Term	Definition
The Board	The Moon HOA Board of Directors, in whichever configuration is currently sitting. Referred to throughout as "the Board," "the Authority," or, in Part V, simply "them." Their decisions are final, subject to Part V and, in theory, Part XIV.
Resident	Any person, entity, or registered life form inhabiting a property within HOA jurisdiction. Includes sub-tenants, crater-shares, and anyone who has been staying "just temporarily" for more than one lunar cycle.
Regolith	The loose surface material covering the Moon. Not to be confused with soil, which implies organic content the Moon does not possess and the Board will not pretend otherwise.
Dust Drift	The unauthorised migration of regolith from one property to another. A violation. Defined in full across 847 pages of Appendix Q.
Albedo	The proportion of solar radiation reflected by a surface. Minimum residential albedo is 12%. Properties below this threshold are considered non-compliant and, frankly, an embarrassment.
Howling	Any sustained vocalisation directed at Earth or the void, whether in celebration, grief, or unexplained compulsion. Regulated under § 4.1.
Oxygen Credits (OC)	The unit of currency used for HOA fines, dues, and assessments. Exchange rate to Earth currencies is set quarterly and has been unfavourable for as long as records have been kept.

Term	Definition
The Monolith Exception	A legacy carve-out permitting one (1) pre-existing monolith per registered property, subject to height limits. No new monolith applications have been approved since incorporation.
The Tribunal	The HOA's internal appeals body. Composed of three Board members, one of whom is always the Chairperson. Described as "independent" in the resident handbook.
Strongly Worded Letter	The primary enforcement instrument of the Moon HOA. Legally non-binding but psychologically effective. Defined further in § 6.4.
Legacy Structure	Any structure, vehicle, experiment package, flag, or object placed on the lunar surface prior to the Association's incorporation in 2088. Governed by Part IX and expressly exempted from most of Part III.
Pre-Association Entity	Any national space agency, government, or organisation that conducted lunar activity prior to 2088 and has not since registered as a Resident. See § 9.5.
Sol Cycle	One full lunar day-night period, approximately 708.7 Earth hours, used for scheduling purposes under § 4.3 where UTC scheduling is impractical.
Crater-Share	A joint occupancy arrangement in which two or more residents occupy a single crater, registered under § 2.4.
Reserve Component	A discrete category of Association infrastructure (e.g., the pool, the meeting hall) tracked separately for funding-adequacy purposes under § 6.5.
Special Assessment	A one-time charge levied against all properties to cover a shortfall not addressed by ordinary dues, per § 6.6.
Grandfathered Non-Conformance	A structure or condition that would violate a current provision of this Charter but predates the provision's adoption and is therefore exempt, pending Board review.

PART II — Residency & Membership

§ 2.1 Eligibility for Residency

2.1.1 Any individual, corporation, consortium, or registered entity wishing to establish residency within Moon HOA jurisdiction must first satisfy the eligibility requirements set out in this Section and the supplementary criteria published in the LRA's "Are You Ready for the Moon?" pamphlet (Form LRA-001-E), available at the front office during hours that have not been officially specified.

2.1.2 Eligibility criteria are as follows:

- The applicant must not have an outstanding dust drift citation on any prior lunar or Martian property.
- The applicant must demonstrate knowledge of the Charter commensurate with having read at least the table of contents and this Section.
- The applicant must not have been a principal party to the 2086 Regolith Incident. If the applicant was involved, they must have expressed written remorse no fewer than three times.
- The applicant must be capable of maintaining their property at or above 12% albedo. Properties below 8% will be declined without appeal.
- The applicant must acknowledge that Association correspondence will be routed to their spam filter and that this is not a malfunction.

2.1.3 The Board reserves the right to decline any application at its sole discretion, for reasons it is not required to disclose, explain, or defend.

§ 2.2 Application Procedures

2.2.1 All applications for residency must be submitted on Form LRA-042-A ("Application for Lunar Residential Admission"), accompanied by the following:

- Completed Form LRA-042-B ("Supplementary Personal Disclosure").
- A certified albedo assessment of the intended property, conducted by an LRA-approved assessor (Appendix B, Volume III).
- A non-refundable application fee of 40 oxygen credits.
- A personal statement of no more than 500 words explaining why the applicant wishes to live on the Moon and what they intend to do about their dust.
- Three character references from individuals who are not also applying for residency at the same time.

2.2.2 Processing time for applications is "at the Board's convenience." The Board acknowledges that this is not a legally meaningful timeframe and maintains that the ambiguity is intentional.

2.2.3 Applicants who are denied may appeal to the Tribunal (see § 5.4). The Tribunal is not expected to overturn the Board's decision. This expectation has historically been accurate.

§ 2.3 The Oath of Lunar Civic Responsibility

2.3.1 Upon approval of their application, each new resident must recite the Oath of Lunar Civic Responsibility in person, before a quorum of at least two Board members, during a formal Oath Ceremony.

2.3.2 Oath Ceremonies are held at the Board's discretion and announced with between 72 and 8 hours' notice. Residents are expected to arrange their schedules accordingly.

2.3.3 The Oath is recited as follows:

I, [NAME], of [CRATER ADDRESS], do hereby solemnly swear to uphold the standards, regulations, and general aesthetic preferences of the Moon Homeowners Association. I acknowledge that my dust is my responsibility. I acknowledge that Earth can see me. I commit to never landing without notice, to keeping my reflectivity above 12%, and to attending the Annual HOA Meeting even if I have a prior engagement, which the Board will want documented. I accept that the Board's decisions are final. I accept that the Tribunal is not truly independent. I accept that my correspondence will go to spam. I do this not under duress, but because I want to live on the Moon, and this is what living on the Moon currently requires.

§ 2.4 Transfer, Subletting & Crater-Share Arrangements

2.4.1 A resident wishing to transfer ownership of their lunar property must notify the Board no fewer than 90 Earth days in advance, using Form LRA-199 ("Notice of Intended Property Transfer"). The Board will acknowledge receipt of this form. The Board will not confirm receipt promptly.

2.4.2 All property transfers additionally require a Lot Transfer & Resale Certificate, obtainable from the Association's Document Processing Centre for a fee of 45 oxygen credits, disclosing the property's assessment balance, open violations, and reserve fund status as of the date of issue. The certificate does not disclose, and the Association accepts no liability regarding, the current location of any Association amenity that has become separated from its registered coordinates.

2.4.3 Subletting is permitted under the following conditions:

- The sublet term does not exceed six lunar cycles.
- The sub-tenant is informed of and agrees to all Charter obligations.
- The primary resident remains fully liable for any violations committed by the sub-tenant, their guests, or their spacecraft.
- The arrangement is registered with the Board on Form LRA-200-S ("Sublet Registration") and the accompanying deposit of 15 oxygen credits is paid.

2.4.4 Crater-share arrangements, in which two or more residents jointly occupy a single crater, are permissible but must be formalised through the Board's Crater-Share Registration process. All parties to a crater-share are jointly and severally liable for dust drift originating from the shared property. The Board will hold whichever party it can locate.

§ 2.5 Resident Standing & Good Standing Requirements

2.5.1 A resident is considered in "Good Standing" where their account carries no fines more than 45 days delinquent, no unresolved Tier 2 or Tier 3 violations, and no more than one outstanding records request they have declined to withdraw.

2.5.2 Residents not in Good Standing may have amenity access, committee eligibility, and Full Moon Party attendance privileges restricted, per §§ 6.6 and 7.2.

2.5.3 Good Standing is reviewed quarterly and posted, by lot number only, on the Association's public registry. Residents objecting to the public posting of their standing may submit a written objection, which the Board will note and take no further action on.

§ 2.6 Resident Directory & Privacy

2.6.1 The Association maintains an internal Resident Directory, distinct from the public Registry (§ 15.1), containing full contact information for all residents. Access is restricted to Board members, committee chairs, and any resident who has completed the Good Neighbour introduction described at § 14.3.

2.6.2 A resident may opt out of directory inclusion by written notice. Opting out does not exempt a resident from receiving Association correspondence, which will continue to arrive regardless, per § 2.1.2, through whatever channel the Board considers reliable.

2.6.3 The Board does not sell, license, or otherwise share Directory information with any Pre-Association Entity, on the theory that none has ever asked, and the Board does not wish to appear eager.

§ 2.7 Residency for Minors & Dependents

2.7.1 A minor or other dependent residing with a registered resident is not separately required to complete the Oath Ceremony (§ 2.3) until reaching the age of majority recognised under the primary resident's Earth nation of origin, at which point they must register independently within 90 days.

2.7.2 Compliance violations attributed to a dependent's conduct (dust drift caused by unsupervised EVA play, for instance) are assessed against the registered resident responsible for that dependent, consistent with the liability standard applied to guests and sub-tenants elsewhere in this Part.

2.7.3 The Association's Welcome Packet (§ 7.7) is issued once per property regardless of the number of dependents residing there. Requests for additional commemorative pins on behalf of dependents are handled the same way as the adult version of the same request: they are denied.

PART III — Property Standards & Surface Maintenance

§ 3.1 Albedo Compliance

3.1.1 All residential properties within Moon HOA jurisdiction must maintain a minimum surface reflectivity (albedo) of twelve percent (12%) at all times. This is not a suggestion. This is the minimum. The Board would prefer higher.

3.1.2 Annual albedo inspections are conducted by an LRA-certified Surface Assessor during the Reflectivity Audit, the date of which is announced with varying levels of advance notice. Residents are advised to maintain continuous compliance rather than preparing specifically for the audit, as the Board is aware of the difference.

3.1.3 Properties found to be below 12% albedo will receive a Deficiency Notice and must achieve compliance within 30 Earth days. Properties below 8% albedo are considered a Blight on the Collective Dignity of the Lunar Surface (Form LRA-BLIGHT-1) and are subject to mandatory remediation.

3.1.4 Methods for improving albedo include: regolith grooming, application of approved reflective surface treatments (Appendix D), removal of dark exterior fixtures, and what one resident described in a compliance interview as "just trying harder." The Board found this sentiment admirable if operationally vague.

3.1.5 Reflectivity Reserve Component funding is addressed at § 6.5. Where the reserve for reflectivity remediation assistance is inadequately funded, enforcement of this Section may be classified "Under Review" without suspending the underlying obligation.

§ 3.2 Dust Containment & Drift Liability

3.2.1 The management of regolith is among the most serious responsibilities of the lunar resident. Dust drift is the single most litigated violation in Association history. The Board takes it seriously. The Board would like residents to take it equally seriously.

3.2.2 The Dust Drift Tolerance Threshold is defined as the migration of no more than 0.3 linear metres of regolith beyond a property's registered boundary within a single lunar day. Drift exceeding this threshold constitutes a Tier 1 violation. Drift exceeding 1 metre constitutes a Tier 2 violation. Drift exceeding 3 metres constitutes what the Board formally refers to as a "Dust Event" and what residents informally refer to as a very bad afternoon.

3.2.3 Liability for dust drift is assigned to the property of origin. In cases where origin is disputed, the Board will conduct an investigation using the Dust Trajectory Analysis protocol set out in Appendix Q. Appendix Q is 847 pages long. Residents are advised to keep their dust contained.

APPENDIX Q NOTICE: The Dust Drift Liability Matrix (Appendix Q, Vol. IV) includes 214 separate drift scenarios, 31 meteorological modifiers, and a section on "malicious drift" that has been invoked in exactly one case, which the Board does not discuss.

3.2.4 Enforcement of dust drift is assessed quarterly via satellite imagery reviewed by the Compliance Office. Board member properties are currently exempt from imagery review pending equipment recalibration, a status that has remained "pending" since the position of Chief Albedo Officer was first filled.

§ 3.3 Structural Regulations

3.3.1 All permanent structures erected on Moon HOA properties must be approved in advance by the Board through the Structural Approval Process (Form LRA-300-STR, accompanying architectural drawings, a site plan, and a written explanation of necessity).

3.3.2 Temporary structures, defined as those intended to stand for fewer than 30 Earth days, require only a Temporary Structure Notification (Form LRA-301-TMP). Structures that were temporary but have stood for more than 30 days are no longer considered temporary and become subject to full Structural Approval retroactively.

3.3.3 The following structural elements are expressly prohibited without a Variance (Form LRA-442):

- Any structure that casts a shadow over a neighbouring property for more than 6 Earth hours per Earth day.
- Any structure that interferes with Earth-visibility of an adjacent property.
- Underground expansions that encroach upon a neighbouring crater's geological boundary, as defined in the LRA's Subterranean Boundary Reference Map (Appendix F, Vol. V).
- Any structure that could reasonably be interpreted as a launch facility without explicit LRA Launch Facility Designation (Form LRA-LAUNCH-1).
- Decorative moats.

3.3.4 Structures pre-dating the Association's incorporation are addressed separately in Part IX and are not subject to retroactive Structural Approval, regardless of how strongly the Board may feel about their placement.

§ 3.4 Lawn Ornaments & Exterior Decoration

3.4.1 Exterior decoration of lunar properties is permitted within the guidelines of this Section and the supplementary LRA Design Guidance document ("Living Well on the Lunar Surface: An Aesthetic Reference"), available from the front office.

3.4.2 The following restrictions apply to all exterior ornaments and fixtures:

- No free-standing ornament may exceed 91.44 centimetres (36 inches) in height, measured from its highest point to the lunar surface, without prior written approval from the Architectural Review Committee.
- Inflatable ornaments are limited to one (1) per property. The Board has not forgotten the 2090 Full Moon Party.
- Novelty satellite dishes are permitted provided they are non-functional and clearly labelled as decorative. Functional satellite or relay dishes under one metre in diameter

may not be restricted regardless of aesthetic preference, per § 9.4 (Legacy Equipment & Communications Carve-Outs); the Committee acknowledges this and periodically issues denials referencing it anyway.

- Monoliths are subject to the Monolith Exception (§ 1.4). One (1) pre-existing monolith is permitted per property. New monolith applications will not be considered. The Board's position on this has not changed and will not be revisited.
- Garden flags, pennants, and banners may not depict imagery the Board deems provocative, or slogans critical of the Association. Flags of registered origin nations, up to 4' x 6', are permitted under § 9.4 regardless of Board preference.

3.4.3 The Board acknowledges that taste is subjective but maintains that some things are objectively wrong. The Architectural Review Committee (see Part XII) meets monthly to review exterior decoration flagged by neighbours or Board members. Written denials must cite the specific bylaw section at issue. Decisions are appealable to the Tribunal, which typically upholds them.

§ 3.5 Crater Modification & Landscaping

3.5.1 The natural craters of the Moon are, in the Board's view, assets to be stewarded rather than inconveniences to be filled in. Crater modification — any alteration to the natural geometry, depth, or rim profile of a registered crater property — requires prior Board approval (Form LRA-CRATER-MOD-1).

3.5.2 Modifications categorised as "minor" (affecting less than 5% of the crater's volume) require a simplified approval process and a 20 oxygen credit processing fee. "Major" modifications require full Board review, a public comment period of 14 Earth days, and a fee of 150 oxygen credits.

3.5.3 Filling in a crater entirely is prohibited. The Board considers this a form of lunar heritage destruction and will respond accordingly, up to and including referral under Part IX where the crater in question contains a Legacy Structure.

3.5.4 Craterscaping — the practice of cultivating approved surface plantings, reflective gravel beds, or regolith art within a crater's rim — is encouraged and is the primary jurisdiction of the Craterscaping Subcommittee (§ 12.4).

§ 3.6 Boundary Markers & Fencing

3.6.1 Property boundaries must be marked with LRA-approved regolith berms, reflective boundary posts, or an Association-issued boundary transponder, at the resident's election. Boundary markers may not exceed 45 centimetres in height, to avoid interference with dust drift imagery review under § 3.2.4.

3.6.2 Decorative fencing beyond the boundary marker itself is treated as an exterior ornament under § 3.4 and is subject to the same height and approval requirements.

3.6.3 Tampering with a neighbour's boundary marker is prohibited under § 4.5.1 regardless of whether the marker is believed to be incorrectly placed. Residents disputing a boundary must

resolve the matter through mediation (§ 14.1) or Tribunal appeal (§ 5.4), not by relocating the marker themselves.

§ 3.7 Signage Standards

3.7.1 One (1) for-sale or for-transfer sign, not exceeding 60 by 90 centimetres, may be displayed per property without ARC approval, and must be removed within 5 Earth days of a completed transfer under § 2.4.

3.7.2 Holiday signage is permitted during the periods specified in Appendix G and must otherwise conform to § 3.4 (Lawn Ornaments & Exterior Decoration).

3.7.3 Signage expressing a political opinion, criticism of the Board, or support for Far Side autonomy is not restricted by content under applicable Earth-derived free expression norms the Board has voluntarily chosen to observe, but remains subject to the same size, placement, and structural requirements as any other sign. The Board notes it has received exactly one sign meeting this description and elected not to comment on its removal, which occurred for unrelated dust drift reasons.

§ 3.8 Approved Exterior Paint & Material Palette

3.8.1 Exterior surface treatments visible from a neighbouring property or the Moonwalk Trail must be selected from the Association's Approved Material Palette, maintained by the Architectural Review Committee and available for inspection at the Document Processing Centre.

3.8.2 The Palette currently recognises six approved finishes: Regolith Grey (standard, no approval required), Reflective White (pre-approved for albedo compliance purposes under § 3.1.4), Tranquility Beige, Highland Tan, Crisium Slate, and, as of this revision, Heritage Bronze, reserved exclusively for structures within 500 metres of a Legacy Structure Buffer Zone and intended to visually distinguish modern construction from historic material.

3.8.3 A resident wishing to use a finish not on the Palette may submit a Palette Exception request through the standard ARC submission process (§ 12.1). The Committee has approved four such exceptions since incorporation and wishes it to be known that this is considered a generous rate.

3.8.4 Reflective additives used solely to satisfy the minimum albedo requirement (§ 3.1.1) do not require Palette approval provided the underlying colour remains compliant, a distinction the Committee acknowledges is subtle and has fielded more questions about than it anticipated.

§ 3.9 Reflectivity Assistance Programme

3.9.1 Residents facing financial hardship in achieving albedo compliance (§ 3.1) may apply for a Reflectivity Assistance grant, funded through the Reflectivity Reserve Component referenced at § 3.1.5, covering up to 50% of certified remediation costs.

3.9.2 Grant availability is directly constrained by the funding level of the underlying Reserve Component, which, per the most recent Reserve Study, is not fully funded. Applications are

processed in the order received and honoured to the extent funds allow, a limitation the Board discloses upfront rather than have residents discover it upon approval of an unfunded grant.

3.9.3 A resident denied a grant solely for lack of available funds remains subject to the compliance deadline at § 3.1.3 regardless. The Board acknowledges this is not, in the ordinary sense, much of a program, and is reviewing funding options as part of the next Reserve Study cycle.

PART IV — Behavioural Standards

§ 4.1 Noise Ordinance & Howling Regulations

4.1.1 The Moon HOA acknowledges that sound does not, in the conventional scientific sense, travel through the vacuum of space. The Board is aware of this. The Board considers it a matter of principle rather than physics. The Noise Ordinance applies regardless, on the theory that any resident capable of being heard by a neighbour through structural conduction, suit radio, or shared amenity walls is capable of violating it.

4.1.2 For the purposes of this Ordinance, "noise" is defined as any sound, vibration, or broadcast transmission produced on a resident's property that can be perceived, received, or intuited by an adjacent resident.

4.1.3 Howling, defined as any sustained vocalisation directed at Earth, the void, or the celestial sphere generally, is a tradition the Board respects while firmly regulating. Permitted howling hours are:

- Saturday: 20:00–23:59 UTC
- Sunday: 20:00–22:00 UTC
- Approved Lunar Holidays (Appendix G, full list of 11 holidays): as specified for each holiday

4.1.4 Howling outside permitted hours constitutes a Tier 1 noise violation. Howling directed at a specific neighbour rather than the cosmos generally constitutes a Tier 2 violation. Enforcement is complaint-driven: the Compliance Office does not monitor howling proactively and acts only upon a signed written complaint from an affected neighbour.

4.1.5 Complaints filed against a sitting Board member require a two-thirds vote of the remaining Board to proceed to a hearing, a threshold that has not yet been met in the Association's history.

§ 4.2 Rocket Landing Protocols

4.2.1 All rocket landings, departures, and hover manoeuvres within Moon HOA airspace (surface to 50km altitude) are subject to the Landing Protocol established by this Section and the supplementary LRA Air Traffic Guidance document (Form LRA-AIR-001).

4.2.2 Rocket landings at a resident's registered landing pad are permitted at all hours, subject to the following conditions:

- The resident must have filed a Pre-Arrival Notification (Form LRA-ARRIVE-1) no fewer than 24 Earth hours before landing.
- The rocket must approach at the approved descent angle of 12° to 15° from vertical, unless a Non-Standard Approach Waiver (Form LRA-NSA-1) has been obtained.
- Thrust must be reduced to low-scatter mode below 500 metres altitude to minimise dust disturbance on neighbouring properties.

- Landing must be completed by 21:00 UTC or deferred to 06:00 UTC. There is no curfew exception for "good reasons."

4.2.3 Emergency landings — necessitated by imminent systems failure, medical emergency, or loss of fuel — are exempt from the 24-hour notification requirement but still require a Post-Arrival Emergency Landing Report (Form LRA-EMERG-1) within 48 hours. The Board understands that emergencies are stressful. The paperwork is still required.

4.2.4 Curfew variances for verified medical transport, emergency resupply, or a demonstrable compelling scheduling conflict may be requested in writing from the Architectural Review Committee. Requests are typically reviewed within 4–6 weeks, a turnaround time the Board considers reasonable for a variance to a curfew.

§ 4.3 Circadian Compliance

4.3.1 The lunar day is approximately 708.7 Earth hours in duration, comprising roughly 354 hours of daylight and 354 hours of darkness. The Board acknowledges this. The Board does not consider it a relevant factor in scheduling.

4.3.2 All residents are required to operate on an Earth-synchronised schedule, specifically UTC, for the purposes of HOA compliance, including fine payment deadlines, meeting attendance, noise curfews, landing windows, and the submission of all forms.

4.3.3 The Board has received several requests to adopt a "Lunar Standard Time." The Board has considered these requests. The Board's response is Form LRA-DECLINE-001, on file, and available upon request for residents who enjoy reading declinations.

§ 4.4 Relations with Non-Association Jurisdictions

4.4.1 The Moon HOA does not govern, regulate, or formally acknowledge any residential or commercial activity occurring on Mars, in Earth orbit, or on any other celestial body. The Board does, however, maintain opinions.

4.4.2 Residents are reminded that the Association does not maintain formal diplomatic relations with any Martian settlement, orbital habitat, or other non-lunar jurisdiction. Any resident engaging in correspondence, commerce, or collaborative construction with such entities does so as a private individual and must ensure no such activity violates the Charter, creates dust drift liability, or reflects poorly on the Association in Earth-visible ways.

4.4.3 Relations with Pre-Association Entities present on the lunar surface prior to incorporation — including national space agencies, robotic mission operators, and private aerospace companies — are governed separately under Part IX and are explicitly not "non-Association jurisdictions" for the purposes of this Section, on the theory that the Board's authority, while unrecognised by these parties, is nonetheless asserted.

§ 4.5 Prohibited Conduct

4.5.1 The following conduct is prohibited within Moon HOA jurisdiction, without exception and without recourse to the Monolith Exception, crater-share arrangements, or any other carve-out:

- Tampering with, removing, or deliberately repositioning HOA boundary markers.
- Filing a false dust drift complaint against a neighbour (taken very seriously; see the Incident of 2091, Appendix D).
- Attempting to secede a crater from HOA jurisdiction. Three residents have tried. All three remain within HOA jurisdiction.
- Hosting unlicensed launch facilities.
- Constructing, operating, or harbouring any inflatable Martian, full-scale or miniature, beyond the one (1) permitted under § 3.4.
- Writing on the lunar surface without a Lunar Surface Expression Permit (Form LRA-WRITE-1). This includes "MONS RULE," which has now appeared on three separate occasions and remains under investigation.
- Impersonating a Board member. The Board is aware this has happened. It was not well received.
- Interfering with, defacing, or relocating any Legacy Structure under Part IX, regardless of the resident's opinion of its aesthetic contribution to the neighbourhood.

A resident once asked whether "MONS RULE" could refer to something other than territorial pride. The Board declined to speculate in writing. It has, however, not ruled anything out.

§ 4.6 Vehicle & Rover Parking Standards

4.6.1 No more than two (2) registered surface vehicles may be parked visibly on a property at any time without a Secondary Vehicle Variance. A vehicle is considered "visible" if it can be observed from an adjoining property or the Moonwalk Trail.

4.6.2 An inoperative or unregistered vehicle left in place for more than 30 days is subject to the Junk Vehicle Ordinance (§ 9.6), applied here to residents on the same terms it is applied to Pre-Association Entities, though with considerably better luck securing compliance.

4.6.3 Rovers, buggies, and other surface vehicles must be parked within the registered boundary of the owning property. A vehicle found idling within a utility easement (Part XI) is subject to the encroachment fine at § 11.5.2 in addition to any parking violation.

4.6.4 Recreational vehicles intended for extended surface expeditions ("crater campers") may be stored on-property for up to 60 days per calendar year without a Temporary Structure Notification, provided they are removed or relocated to a registered storage facility thereafter.

§ 4.7 Pets, Companion Organisms & Registered Life Forms

4.7.1 Residents may keep companion organisms consistent with the life-support capacity of their registered property, subject to a limit of two (2) per household unless a Companion Organism Variance has been obtained.

4.7.2 All companion organisms must be registered with the Association within 30 days of arrival, using the general Resident Amendment channel pending the Board's adoption of a dedicated form, which has been "in progress" since 2091.

4.7.3 Companion organisms are subject to the Noise Ordinance (§ 4.1) on the same terms as their owners, and any resulting dust drift, howling, or exterior decoration violation (a companion organism knocking over a registered lawn ornament, for instance) is attributed to the registered resident.

4.7.4 Non-terrestrial organisms of unconfirmed origin may not be kept, bred, or exhibited without prior written clearance from the Board and, where applicable, whichever Earth-based biosafety authority the Board can be persuaded still has jurisdiction. To date, no such clearance has been requested.

§ 4.8 Emergency Powers

4.8.1 In the event of a Dust Event (§ 3.2.2), solar flare warning, moonquake, or other emergency the Chairperson declares in good faith, the Board may suspend enforcement of curfews (§ 4.2.2), noise restrictions (§ 4.1), and Mandatory Community Event attendance (§ 7.2) for the duration of the emergency plus 48 hours.

4.8.2 Emergency declarations must be ratified by a majority Board vote within 72 hours or automatically lapse. The Board has issued four emergency declarations since incorporation, three of which concerned actual emergencies.

4.8.3 Nothing in this Section suspends dues, fines already assessed prior to the emergency, or the Board's ability to send correspondence, emergencies apparently not being sufficient reason to pause the Association's paperwork.

PART V — Governance & Board Authority

§ 5.1 Board Composition & Election

5.1.1 The Moon HOA Board of Directors consists of seven (7) members: the Chairperson, the Deputy Director of Surface Standards, the Keeper of the Dust Drift Ledger, the Director of Community Relations, the Chief Albedo Officer, the Treasurer (Oxygen Credits Division), and one (1) At-Large Member representing the general residential population.

5.1.2 The current Board is composed as follows:

Seat	Officer	Notes
Chairperson	Adaeze Okafor	Also serves on the Tribunal (§5.4). This is by tradition, not requirement.
Deputy Director of Surface Standards	Tobias Renn	Reviews and countersigns all Strongly Worded Letters (§6.4).
Keeper of the Dust Drift Ledger	Position Currently Vacant	Vacant since 2092. Applications are not currently being accepted. See § 5.1.4.
Director of Community Relations	Youssef Haddad	Prepares the Full Moon Party seating chart (§7.3).
Chief Albedo Officer	Priya Anand	Oversees the annual Reflectivity Audit (§3.1).
Treasurer, Oxygen Credits Division	Marcus Ilves	Administers dues, fines, and special assessments (Part VI).
At-Large Member	Ingrid Solheim	Elected biennially; the only seat regularly contested (see Part XII).

5.1.3 Board members serve three-year terms. Elections are held annually for whichever seats are available. The Chairperson's seat is not subject to election. The Chairperson serves "at the pleasure of the Board," which in practice means indefinitely.

5.1.4 The position of Keeper of the Dust Drift Ledger has been vacant since 2092. Applications are not currently being accepted. The Board is "working through some things" regarding this role and will announce next steps in due course. The Association's internal newsletter has, on at least two occasions, published unconfirmed sightings of an individual matching the last known Keeper's description at community events; the Board has declined to comment further.

A former resident once submitted a Records Request specifically asking what happened to the Keeper. The request was assigned a ticket number and is, as of this printing, still Under Review.

§ 5.2 Powers of the Board

5.2.1 The Board has the power and authority to:

- Interpret, amend, and enforce all provisions of this Charter.
- Levy fines, issue Strongly Worded Letters, and revoke residential privileges.

- Approve or deny all applications, permits, variances, and exceptions described in this Charter.
- Convene emergency sessions at any time for any reason the Chairperson deems sufficient.
- Commission investigations, audits, and inspections of any HOA property.
- Establish committees, subcommittees, and working groups, all of which report to the Board (Part XII).
- Decline to explain its reasoning on any matter, except when required to by the Tribunal, which is composed of Board members.

§ 5.3 Meeting Procedures

5.3.1 Regular Board meetings are held on the first Earth-Saturday of each calendar month, at 14:00 UTC, in the Moon HOA Community Hall. Remote attendance is permitted but regarded with mild suspicion.

5.3.2 The agenda for each meeting is circulated no fewer than 72 hours before the meeting, unless the agenda is being kept confidential, in which case it will be circulated immediately before the meeting begins.

5.3.3 Residents may submit agenda items for consideration by the Board. The Board will consider them. The Board will then decide whether to include them on the agenda. The Board is under no obligation to include them.

5.3.4 Votes are taken by show of hands. The Chairperson's hand counts for two. This is not in question and has not been challenged since incorporation.

5.3.5 Quorum for a regular meeting requires a simple majority of the sitting Board (four of seven, or three of six while the Keeper's seat remains vacant). Minutes of each meeting are archived and, upon request, made available to residents in Good Standing.

5.3.6 The Annual HOA Meeting, held on the first Saturday of the fourth quarter, requires attendance or proxy from at least 25% of registered lots to establish quorum for binding votes (e.g., budget ratification, Board elections). Meetings failing to meet this threshold proceed as informal gatherings; refreshments are served regardless, per § 7.1.

§ 5.4 Appeals & the Tribunal

5.4.1 Any resident who receives a fine, violation notice, or adverse decision from the Board may appeal to the Tribunal within 14 Earth days of receiving notice of the decision.

5.4.2 The Tribunal consists of three Board members appointed by the Chairperson. The Chairperson typically appoints herself to serve on the Tribunal. The Board considers this appropriate.

5.4.3 The Tribunal will hear appeals within 60 Earth days of filing. In practice, hearings are typically scheduled somewhat later. Residents are advised to remain patient and compliant in the interim.

5.4.4 Prior to a Tribunal hearing, residents are strongly encouraged (though not required) to attempt informal mediation under § 14.1. Approximately one in five disputes are resolved at this stage, a figure the Board considers evidence that the mediation program is working and residents consider evidence that most disputes never had a chance to begin with.

5.4.5 The Tribunal's decisions are final. There is no further appeal within the Moon HOA system. Residents wishing to pursue matters beyond the Tribunal are welcome to do so through whatever legal mechanisms they can locate that claim jurisdiction over the Moon. The Board wishes them the best.

§ 5.5 Board Member Eligibility, Conflicts & Recusal

5.5.1 A Board candidate must be a resident in Good Standing for no fewer than two years prior to nomination, per § 12.7. No resident may hold more than one Board seat concurrently, nor serve simultaneously on the Board and the Tribunal in a matter concerning their own property.

5.5.2 A Board member with a direct financial or familial interest in a matter before the Board must disclose the interest and recuse from the associated vote. The Board notes that recusal, once declared, may be withdrawn by the same member if doing so is necessary to break a tie, a practice the Board has elected not to prohibit outright.

5.5.3 A Board member who misses three consecutive regular meetings without an approved exemption (§ 7.2.1) may be removed from committee assignments by majority vote, though not from the Board seat itself absent the process at § 5.6.

§ 5.6 Removal of a Board Member

5.6.1 A Board member other than the Chairperson may be removed prior to the end of their term by a petition signed by 40% of residents in Good Standing, followed by a majority vote of registered lots at a special meeting called for that purpose.

5.6.2 No removal petition has, to date, gathered sufficient signatures to proceed to a vote. The Grievance & Ethics Committee (§ 12.8) has, however, received several petitions that fell short, which it has filed for reference.

5.6.3 The Chairperson's seat, being non-elective under § 5.1.3, is not subject to this Section. Residents wishing to raise concerns about the Chairperson specifically are directed to § 12.8 and reminded that the Committee's findings are forwarded to the Board for a final decision.

§ 5.7 Board Compensation & Expense Reimbursement

5.7.1 Board service is uncompensated. Board members may be reimbursed for documented, pre-approved expenses incurred in carrying out Board duties, including printing and typesetting costs for Strongly Worded Letters (§ 6.4.2) and travel costs for the rare in-person meeting with a responsive Pre-Association Entity representative, a category of expense that has, to date, never actually been claimed.

5.7.2 The commemorative pin issued to Board members upon taking office is the only in-kind benefit of Board service recognised under this Charter, and is, per § 7.7.1, functionally identical to the one issued to new residents and Premium Compliance Programme participants.

PART VI — Fees, Fines & Enforcement

§ 6.1 Annual HOA Dues

6.1.1 Annual HOA dues are payable on the first day of each Earth calendar year. The standard annual due is 200 oxygen credits. Crater-share residents pay 120 oxygen credits each. Residents in the Board's Premium Compliance Programme pay 180 oxygen credits and receive a small pin.

6.1.2 Late payment of dues (beyond 30 Earth days past due) incurs a Late Payment Surcharge of 15 oxygen credits. Late payment beyond 60 days incurs an additional surcharge of 20 oxygen credits. Late payment beyond 90 days results in a Strongly Worded Letter, a formal compliance review, and referral to the collections process at § 6.7.

6.1.3 Dues are used to maintain community amenities, fund the Reflectivity Audit, operate the Board's administrative office, and cover the cost of producing Strongly Worded Letters, which the Board acknowledges are not cheap to have professionally typeset.

§ 6.2 Schedule of Fines

The following schedule reflects standard fine amounts as of this revision. A consolidated master schedule, including fines added by Parts IX through XV, appears at Appendix B. The Board reserves the right to apply discretionary uplift in cases of repeated violations, aggravated circumstances, or what the Board formally describes as "a general attitude problem."

Violation	Standard Fine	Notes
Dust drift (Tier 1: 0.3–1m)	20 OC	First offence. Accompanied by letter.
Dust drift (Tier 2: 1–3m)	60 OC	Second offence or Tier 2 event.
Dust drift (Tier 3: Dust Event)	200 OC	Plus mandatory remediation.
Albedo non-compliance	40 OC	Per audit cycle. Plus Deficiency Notice.
Unauthorised late landing	40 OC	Per incident.
Unlicensed structure	80 OC	Plus retroactive approval process.
Howling outside permitted hours	25 OC	35 OC if during Board meeting hours.
Unapproved lawn ornament	30 OC	Ornament must also be removed.
Unauthorised additional inflatable ornament	100 OC	Immediate removal required.
Unauthorised surface writing	50 OC	Plus cost of lunar surface restoration.
Impersonating a Board member	250 OC	Plus formal apology at next meeting.
Attempted secession	500 OC	Secession will not be recognised regardless.
New monolith installation	1,000 OC	The Board will not negotiate on this.

§ 6.3 Enforcement Procedures

6.3.1 Enforcement of this Charter is the responsibility of the Board, which may delegate inspection authority to LRA-certified Surface Assessors, Compliance Officers, and, in urgent cases, any Board member who happens to be passing by.

6.3.2 Upon identification of a violation, the following enforcement sequence applies:

1. Issuance of a Violation Notice (Form LRA-VIO-1), delivered electronically and physically to the resident's registered contact information.
2. If the violation is not remediated within the specified cure period, issuance of a Strongly Worded Letter (§ 6.4).
3. If the violation persists, imposition of the applicable fine.
4. If the fine is not paid and the violation continues, referral to the collections process (§ 6.7) and, where applicable, the Tribunal.
5. If the Tribunal confirms the violation and the resident remains non-compliant, the Board reserves the right to impose such further measures as it deems appropriate, up to and including revocation of recreational access to the Moonwalk Trail.

6.3.3 The Board acknowledges that the final step has only been invoked twice. Both times, it was extremely effective.

§ 6.4 The Strongly Worded Letter Protocol

6.4.1 The Strongly Worded Letter is the Moon HOA's primary instrument of persuasion. It predates the formal fine schedule and remains, in the Board's view, the most powerful tool in its enforcement arsenal. This is not entirely rational. The Board is at peace with that.

6.4.2 Strongly Worded Letters are drafted by the Chairperson, reviewed by the Deputy Director of Surface Standards, typeset by a contracted professional based on Earth, and delivered via registered lunar mail. Turnaround time is between 3 and 21 Earth days. The Board believes the wait adds to the effect.

6.4.3 A Strongly Worded Letter contains: a formal salutation; a precise description of the violation; a citation of the relevant Charter section; a statement of the Board's disappointment; a clear description of required remediation; a deadline; and a closing line that is professionally cordial but leaves no doubt about the Board's feelings. Every word is chosen with care.

6.4.4 Strongly Worded Letters are countersigned by all sitting Board members, including whichever one is currently serving as Keeper of the Dust Drift Ledger, even when that position is vacant, in which case the signature line reads "[Position Vacant — Intent Endorsed.]"

§ 6.5 Reserve Components & the Reserve Study

6.5.1 The Association maintains a reserve fund, allocated across discrete Reserve Components (each a defined category of shared infrastructure), to cover major repair and replacement costs without resort to special assessment.

6.5.2 A Reserve Study is commissioned biennially, assessing each component's current funding level as a percentage of its recommended target. Industry consensus (adopted by the Board without independent verification of what industry, exactly) holds that a component funded below 70% is inadequately funded, and below 30% is a critical shortfall.

6.5.3 The current Reserve Study Summary is published as a standalone Association document and is referenced, where relevant, throughout this Charter. Where a component is found critically underfunded, the Board acknowledges this in writing and does not, as a rule, consider it actionable at that time.

6.5.4 A resident may request a full copy of the current Reserve Study through the Records Request process (§ 15.4). Estimated response time is 1–3 lunar cycles.

§ 6.6 Special Assessments

6.6.1 Where a Reserve Component's shortfall cannot be absorbed by ordinary dues, the Board may levy a Special Assessment against all registered properties by resolution, specifying the amount, the reason, and a due date no sooner than 45 days from notice.

6.6.2 Special Assessment notices must disclose the relevant Reserve Component's funding percentage as of the most recent Reserve Study. Payment plans of 12 to 24 lunar cycles are available upon written request and documentation of financial hardship.

6.6.3 Properties with a Special Assessment balance outstanding 45 days past due are subject to the collections process at § 6.7 on the same terms as delinquent dues or fines.

§ 6.7 Collections & Delinquency Policy

6.7.1 Assessments and fines are due within 45 days of notice unless otherwise stated. The Association's collections process proceeds as follows:

Stage	Day	Action
1	1–45	Payment due. Payment plans available on written request.
2	46	Account declared delinquent. Late fee (35 OC) plus 1.5% monthly interest applied.
3	60	Formal demand letter sent via certified transmission (approx. 2.6 second one-way delay, per standard communications terms).
4	90	Account referred to the Association's collections counsel. Counsel's fees and costs of collection are added to the balance owed.
5	120	Lien recorded against the property with the Lunar Registry Office.

IMPORTANT NOTICE: IF YOUR PROPERTY IS PLACED IN FORECLOSURE BECAUSE YOU ARE BEHIND ON ASSESSMENTS, IT MAY BE SOLD WITHOUT FURTHER PROCEEDINGS.

6.7.2 Amenity access (pool privileges, meeting hall entry, broom checkout at the Crater Cleanup Station) may be suspended for any account more than 30 days delinquent, regardless of collections stage.

6.7.3 A resident may dispute a delinquency determination through mediation (§ 14.1) prior to lien filing. The Board notes this option exists. The Board has not yet had to explain it to anyone who reached Stage 5 first.

§ 6.8 Fine Appeals & Payment Plans

6.8.1 A resident may appeal an individual fine (as distinct from a delinquency determination under § 6.7) directly to the Tribunal within 14 days, per § 5.4, or request a payment plan of up to 6 lunar cycles without appealing the underlying violation.

6.8.2 A fine reduced or overturned on appeal is refunded in oxygen credits within one billing cycle. The Board notes that this has occurred with sufficient rarity that it maintains no dedicated form for the refund process, handling it instead as a manual adjustment.

6.8.3 Interest does not accrue on a fine under formal appeal. Interest resumes accruing, retroactive to the original due date, if the appeal is denied.

§ 6.9 Compliance Rebate Programme

6.9.1 A resident maintaining Good Standing (§ 2.5) for 24 consecutive months without a single violation is eligible for a Compliance Rebate of 20 oxygen credits against the following year's dues.

6.9.2 The Board established this Programme in response to resident feedback that the Charter contains, in the Board's own internal phrasing, "rather a lot of ways to be punished and comparatively few ways to be rewarded." The Board considers the Programme a good-faith response to that feedback and would ask that it be judged on its own terms rather than by comparison to Part VI as a whole.

6.9.3 Rebate eligibility is suspended, not forfeited, by a Tribunal appeal that is ultimately decided in the resident's favour; a violation overturned on appeal does not count against the 24-month clock.

PART VII — Amenities, Events & Community Life

§ 7.1 Community Amenities

7.1.1 The Moon HOA provides and maintains the following community amenities for the use of all residents in Good Standing. Residents with outstanding fines or violations may have amenity access restricted at the Board's discretion.

The Zero-Gravity Swimming Pool

The community swimming pool is a sealed, pressurised facility located at the eastern edge of Sector Alpha. It operates on a zero-gravity-optional basis during designated floating hours (Tuesdays and Thursdays, 09:00–12:00 UTC) and standard lunar gravity at all other times. The pool's current whereabouts are addressed in the Association's most recent Special Assessment Notice. Residents with sightings are asked to report them to the front office.

The Moonwalk Trail

A 3.2-kilometre walking path traversing the southern rim of Sector Alpha, maintained by the Crater Cleanup Crew and open during daylight hours, which on the Moon are extremely long. Helmets and EVA suits are required. The Board accepts no responsibility for losses incurred by residents who disregard this requirement.

The Solar Tanning Deck

A flat, open-surface recreational platform on the northern face of Sector Alpha, receiving approximately 354 consecutive hours of sunlight followed by 354 hours of darkness. The Board acknowledges this is not ideal for a tanning schedule. The Board built it anyway.

The Document Processing Centre

Located in the Sector Alpha Community Hall, providing access to all LRA forms, a dedicated submission window, and one (1) informational pamphlet rack. Open during office hours posted on the door, which the Board is aware have not been updated recently.

The Legacy Overlook

A viewing platform, added in this revision, overlooking the Tranquility Base preservation zone (see Part IX). Residents and visitors may observe the historic site from a respectful distance of not less than 200 metres, per the Association's Legacy Buffer Zone requirements. Telephoto imaging equipment is permitted; landing is not.

§ 7.2 Mandatory Community Events

7.2.1 The following events are mandatory for all residents, defined as compulsory attendance unless a valid exemption has been filed on Form LRA-EXEMPT-1 and approved by the Board. The Board approves approximately 30% of exemption requests. Medical exemptions have a higher approval rate. "I forgot" does not qualify as a medical condition.

- Crater Cleanup Crew (monthly, date TBD with variable notice): community regolith management event. Residents must bring their own brooms. The Association does not supply brooms.
- Annual Reflectivity Audit (date TBD): mandatory presence at one's property during the inspection window. Absence is treated as consent to the Board's assessment.
- Annual HOA Meeting (first Saturday of Q4): full resident attendance expected. The agenda is circulated in advance to those the Board chooses to inform in advance.

§ 7.3 The Full Moon Party: Rules & Expectations

7.3.1 The Full Moon Party is the Moon HOA's premier community event, held annually on the Saturday nearest the Earth-visible Full Moon. Attendance is not merely encouraged; it is required. The Board has no sympathy for shyness, social anxiety, or general tiredness. These are not exemptions.

7.3.2 The following rules govern conduct at the Full Moon Party:

- All residents must arrive within 30 minutes of the official start time. Late arrivals will be noted in the attendance log.
- The howling window at the Full Moon Party runs from 21:00 to 21:30 UTC. Howling outside this window at the event is still subject to the standard Howling Ordinance.
- No resident may bring an inflatable Martian to the Full Moon Party beyond the one (1) permitted under § 3.4. This is mentioned separately because of the 2090 incident, which the Board has not moved on from.
- Residents with pending dust drift complaints against each other are seated on opposite sides of the venue, per a seating chart prepared by the Director of Community Relations. It is not negotiable.
- The event concludes at 23:00 UTC. Residents lingering beyond 23:15 are considered to be attending an unauthorised gathering and will receive a notice.

7.3.3 The Board genuinely enjoys the Full Moon Party and would like residents to enjoy it as well. The Board recognises that its regulations do not always create the conditions for enjoyment. The Board is working on this.

§ 7.4 Guest & Visitor Policy

7.4.1 Residents may host guests for stays of up to 14 Earth days without registration. Stays exceeding 14 days require a Guest Registration (Form LRA-GUEST-1) and are subject to a nightly amenity-use fee of 2 oxygen credits.

7.4.2 Guests are bound by all provisions of this Charter for the duration of their stay. The hosting resident remains liable for any violation committed by a guest, consistent with the liability standard applied to sub-tenants under § 2.4.

7.4.3 Tour groups visiting the Legacy Overlook (§ 7.1) under an approved heritage-tourism permit are exempt from Guest Registration but must remain within the designated viewing area at all times, accompanied by a permit holder.

§ 7.5 Short-Term & Heritage-Tourism Occupancy

7.5.1 A resident wishing to let their property for short-term occupancy (fewer than 6 lunar cycles, distinct from the Subletting provisions at § 2.4.3) must obtain a Short-Term Occupancy Permit and remains liable for all occupant conduct under the same standard applied to guests at § 7.4.2.

7.5.2 No more than two properties per crater-share arrangement may hold an active Short-Term Occupancy Permit simultaneously, to preserve what the Board's guidance document calls "a residential character," a phrase the Board declines to define further.

7.5.3 Properties within 500 metres of a Legacy Structure (Appendix C) may not be let for heritage-tourism short-term occupancy without additional sign-off from the Legacy Equipment Preservation Subcommittee (§ 12.3), to prevent unauthorised commercial exploitation of a historic site's proximity.

§ 7.6 Holiday Decoration Standards

7.6.1 Holiday decorations may be displayed beginning 14 days before, and must be removed within 10 days after, each holiday listed in Appendix G. Decorations displayed outside this window are treated as an unapproved exterior ornament under § 3.4.2.

7.6.2 Illuminated holiday decorations remain subject to the Dark-Surface Design Guidance (§ 10.2) and may not be left operating during designated dark-hours beyond the holiday period.

7.6.3 The Board has not, despite requests, established a Best Decorated Property award, citing a 2090 incident in which the judging process itself became the subject of a Tribunal appeal. The matter remains a sensitive one at Social Events Committee meetings (§ 12.5).

§ 7.7 New Resident Welcome Packet

7.7.1 Every new resident receives a Welcome Packet upon completion of the Oath Ceremony (§ 2.3), consisting of: a printed copy of this Charter (Volume I only, by default; Volumes II through XII available on request and, the Board notes, on request only); a laminated Quick Reference Card summarising the fine schedule at Appendix B; a Moonwalk Trail map; a Craterscaping starter kit voucher; and one (1) commemorative pin, identical to the pin issued under the Premium Compliance Programme at § 6.1.1, which new residents receive automatically and existing residents must pay 180 oxygen credits to obtain, a discrepancy the Board has elected not to address in this revision.

7.7.2 The Welcome Packet additionally includes a personally addressed letter from the Director of Community Relations, a schedule of upcoming Mandatory Community Events (§ 7.2), and a gentle reminder that the front office's posted hours have not been updated since before most current residents arrived.

7.7.3 New residents are encouraged, though not required, to attend the following month's Crater Cleanup Crew event as an informal introduction to their neighbours, consistent with the aspirations (if not the enforcement mechanism) of the Good Neighbour Policy at § 14.3.

§ 7.8 Amenity Reservation & Booking

7.8.1 The Community Hall and Legacy Overlook viewing platform may be reserved for private resident gatherings up to 60 days in advance through the Document Processing Centre, subject to availability and to displacement by any Mandatory Community Event (§ 7.2) scheduled for the same date.

7.8.2 A reservation deposit of 10 oxygen credits is refunded upon return of the space in its original condition. Residents are reminded that "original condition" for the Legacy Overlook specifically includes maintaining the Buffer Zone distance at all times, per § 9.8.2, regardless of how private the gathering feels.

PART IX — Legacy Equipment, Historic Sites & Pre-Association Infrastructure

§ 9.1 Background & Jurisdictional History

9.1.1 The Association's incorporation in 2088 did not occur on an empty lunar surface. By the time the first Charter was ratified, the Near Side already hosted well over a century of accumulated human and robotic activity: descent stages, rovers, scientific instrument packages, flags, and a modest but growing quantity of personal effects, tools, and what one internal memo delicately termed "deliberately discarded operational surplus."

9.1.2 This Part exists because the Board, upon reviewing the surface inventory during incorporation proceedings, discovered it had inherited jurisdiction over a considerable quantity of pre-existing equipment it had no hand in placing, no legal ability to remove, and, in several cases, no polite way to describe.

9.1.3 The Board wishes to state clearly, for the record, that it regards these sites with genuine historical respect. It also wishes to state, immediately afterward, that several of them would not pass a modern Structural Approval review, and that this tension is the entire subject of this Part.

§ 9.2 Register of Pre-Existing Historic Surface Structures

9.2.1 The Board maintains a formal Register of all structures, vehicles, and equipment placed on the lunar surface prior to incorporation. The full Register, including site coordinates, is published at Appendix C of this Volume. A representative excerpt is provided here for context.

Site / Region	Origin	Approx. Era	Notable Contents	Register Status
Tranquility Base, Sea of Tranquility	United States (first crewed landing)	Late 20th c.	Descent stage, flag, seismometer and retroreflector, tools, boots, and an estimated 100+ smaller discarded items	Registered — Grandfathered
Ocean of Storms site	United States	Late 20th c.	Descent stage, scientific instrument package, and a nearby robotic probe visited and partially sampled by the crew	Registered — Grandfathered
Fra Mauro highlands site	United States	Early 1970s	Descent stage, instrument package, and two recreational sporting items left by a crew member during an unscheduled demonstration	Registered — Grandfathered
Hadley Rille site	United States	Early 1970s	Descent stage, first lunar roving vehicle, a small memorial sculpture and plaque, and a scientific instrument dropped as part of a public physics demonstration	Registered — Grandfathered; memorial under special protection, § 9.3.4

Site / Region	Origin	Approx. Era	Notable Contents	Register Status
Descartes Highlands site	United States	Early 1970s	Descent stage, second lunar roving vehicle, and a personal family photograph left by a crew member	Registered — Grandfathered
Taurus-Littrow site	United States	Early 1970s	Descent stage, third and final lunar roving vehicle, commemorative plaque, and surface inscriptions left by the final crew to walk on the surface	Registered — Grandfathered
Multiple polar and mid-latitude sites	Soviet Union / Russian Federation	Mid-late 20th c.	Robotic landers and two teleoperated rovers, several still used for modern laser-ranging experiments	Registered — Grandfathered
Multiple near-side and one far-side site	China (CNSA)	21st c.	Robotic landers and rovers, including the first successful far-side landing and two robotic sample-return missions	Registered — Grandfathered; far-side site outside enforcement range, § 1.2.2
South polar region site	India (ISRO)	21st c.	Robotic lander and rover, the first successful soft landing in the lunar south polar region	Registered — Grandfathered
Multiple commercial sites, various regions	Private aerospace companies (multiple nations)	21st c.	A growing and occasionally overlapping set of robotic landers, several of which did not land upright	Registered — Grandfathered; several classified Non-Conforming, § 9.6
Various near-side coordinates	Multiple, uncrewed	Mid-20th c. onward	Impact sites, discarded rocket stages, and abandoned upper-stage hardware, not individually catalogued below 50kg	Partially Registered — see Appendix C

Enthusiast residents have occasionally cross-referenced the coordinates in Appendix C against public astronomical charts and confirmed them to be, in every case checked, real. The Board neither confirms nor denies that this was intentional.

§ 9.3 The Legacy Structure Grandfather Clause

9.3.1 Any structure appearing on the Register at § 9.2 is, upon registration, deemed a Grandfathered Non-Conformance and is exempt from Parts III, IV, and VI of this Charter, regardless of albedo, structural approval, curfew, or aesthetic standards it would otherwise violate.

9.3.2 The Board's Aesthetic Review Committee is expressly prohibited from issuing a denial, citation, or removal order against any Legacy Structure. This has not stopped the Committee from noting, in its quarterly minutes, that several sites "could benefit from tidying."

9.3.3 No new Legacy Structure designation will be granted after the date of incorporation. Structures placed after 2088 are, without exception, subject to full Structural Approval under § 3.3 and the New Arrivals Registration process at § 9.7.

9.3.4 Memorial installations identified in the Register receive additional protection: no Association action, commercial tourism permit, or Legacy Overlook activity (§ 7.1) may disturb, relocate, or commercially exploit a memorial site. The Board regards this provision as non-negotiable and has declined, on at least one occasion, a resident's proposal to sell viewing rights.

§ 9.4 Legacy Equipment & Communications Carve-Outs

9.4.1 No provision of this Charter may be interpreted to restrict a small satellite or relay dish (under one metre in diameter), a national flag of registered origin (up to 4' x 6'), or a laser-ranging retroreflector, regardless of the aesthetic preferences of the Architectural Review Committee.

9.4.2 This carve-out exists because several Legacy Structures under § 9.2 include exactly this equipment, actively in use by Earth-based researchers for ongoing scientific measurement. The Board has been advised, more than once, that fining an active laser-ranging experiment for non-compliant albedo would be "embarrassing, and also probably illegal in several jurisdictions that do not recognise ours anyway."

9.4.3 The carve-out extends to functioning communications equipment operated by a currently active Pre-Association Entity mission, per § 9.5, for the duration of that mission's operational life as reported to the Association by whatever means the Board can independently verify.

§ 9.5 Correspondence with Pre-Association Entities

9.5.1 The Board has, at various points since incorporation, attempted to serve compliance correspondence — including dues notices, Reflectivity Audit scheduling requests, and one memorable Strongly Worded Letter regarding an inoperative lander blocking a proposed Moonwalk Trail extension — on several national space agencies and private aerospace companies operating equipment within Association jurisdiction.

9.5.2 None of these parties has, to date, formally acknowledged the Association's authority. Several have not acknowledged the correspondence at all. Per § 8.3 (Governing Law), non-response is treated by the Board as constructive delivery, though the Board acknowledges this legal theory has not been tested outside its own meeting minutes.

9.5.3 A running log of correspondence sent to Pre-Association Entities, and the (near-uniform) absence of response, is maintained at Appendix D (Historical Incident Log) for transparency and, the Board admits, a certain amount of institutional catharsis.

9.5.4 Nothing in this Section should be read as the Association attempting to collect dues from a sovereign government. The Board has taken outside advice on this point. The advice was, in essence, "please stop." The Board has elected to continue sending the courtesy notices regardless, on the grounds that they cost nothing and the Board finds the exercise clarifying.

§ 9.6 Application of the Junk Vehicle Ordinance to Derelict Landers & Rovers

9.6.1 Any post-incorporation lander, rover, or surface vehicle that (a) has ceased operation, (b) is visibly non-upright, or (c) has remained stationary and unregistered for more than 180 Earth days is subject to the Junk Vehicle Ordinance, on the same terms a residential HOA would apply to an inoperative car left visible from the street.

9.6.2 A Junk Vehicle Notice (Form LRA-JUNK-1) will be issued to the operating entity's last known point of contact, granting 90 days to either restore the vehicle to operational status, register it as a permanent installation under § 9.7, or arrange removal. Given the Association's success rate at securing responses under § 9.5, this notice functions, in practice, primarily as a matter of record.

9.6.3 Several commercial landers arriving after incorporation have come to rest at an angle the Board considers structurally undignified. These are catalogued at Appendix C with a Register Status of "Non-Conforming, No Enforcement Action Available," a category the Board created specifically for this purpose.

§ 9.7 New Arrivals: Registration Requirements for Post-Incorporation Landings

9.7.1 Any crewed or robotic mission intending to land within Association jurisdiction after the date of incorporation is strongly encouraged, though not currently able to be compelled, to file a Pre-Arrival Notification (Form LRA-ARRIVE-1) consistent with § 4.2, and to register any surface equipment intended to remain in place beyond 30 days as a Temporary or Permanent Structure under § 3.3.

9.7.2 The Board notes that recent crewed lunar flyby and upcoming landing missions under various national programmes have not, to date, filed Form LRA-ARRIVE-1. The Board has sent the form regardless, by the same correspondence process described at § 9.5, and considers the matter open.

9.7.3 Where a new arrival's mission concludes and its equipment is abandoned in place, that equipment becomes subject to § 9.6 (Junk Vehicle Ordinance) rather than automatic Legacy Structure status, per § 9.3.3. The Board wishes to be clear that being old is a prerequisite for historic status, not merely being broken.

§ 9.8 The Lunar Heritage Preservation Accord

9.8.1 The Association is a voluntary signatory to the Lunar Heritage Preservation Accord, a multilateral framework under which participating associations and agencies agree to maintain buffer zones, restrict commercial activity, and coordinate preservation standards around historically significant surface sites.

9.8.2 Buffer zone distances under the Accord are set out at Appendix C alongside each Register entry. The Legacy Overlook (§ 7.1) was designed specifically to allow resident and visitor access to Tranquility Base without breaching the Accord's minimum buffer distance.

9.8.3 The Board notes that various Earth-based governments maintain their own, overlapping heritage-preservation statutes covering the same sites. The Board finds this redundant, given the Association's own Register, but has elected not to contest it, on the theory that more preservation law is unlikely to be the problem.

§ 9.9 Heritage Tourism & Commercial Filming Restrictions

9.9.1 Commercial photography, filming, or livestreaming from within a Legacy Structure's Buffer Zone (Appendix C) requires a Heritage Filming Permit, issued by the Legacy Equipment Preservation Subcommittee, in addition to any Legacy Overlook Heritage-Tourism Permit under § 7.4.3.

9.9.2 Permit fees are set on a sliding scale based on production budget, self-reported, on the honour system the Board readily admits has no enforcement mechanism whatsoever.

9.9.3 No filming permit will authorise entry into a Buffer Zone itself; all commercial filming must be conducted from the Legacy Overlook or an equivalent designated exterior vantage point.

§ 9.10 Artifact Recovery & the No-Removal Policy

9.10.1 No resident, contractor, or permit holder may remove, relocate, or take possession of any item catalogued in the Register at § 9.2, regardless of the item's apparent condition, abandonment, or resale value.

9.10.2 A resident who discovers an uncatalogued item within a Buffer Zone must report it to the Legacy Equipment Preservation Subcommittee for potential Register inclusion rather than retaining it. Failure to report carries the fine at Appendix B for Interfering with a Legacy Structure.

9.10.3 This policy applies with equal force to items of apparent low value (discarded tools, wrappers, and other toss-zone debris) as to items of obvious historical significance, on the theory — which the Subcommittee has had to state explicitly more than once — that the distinction is for historians to make later, not residents to make now.

§ 9.11 A Brief History of Activity Prior to Incorporation

9.11.1 The Board offers the following summary for residents who find the Register at § 9.2 easier to appreciate with context. It is not intended as a complete history, and residents seeking one are directed to Earth-published sources, which the Board notes are considerably more thorough than anything the Association is equipped to produce.

9.11.2 Robotic activity on the lunar surface predates crewed activity by roughly a decade. The earliest impacting and soft-landing probes, launched by what was then the Soviet Union, arrived beginning in the late 1950s and continued through the following two decades, eventually including two teleoperated surface rovers still referenced today in laser-ranging work under § 9.4.2.

9.11.3 Crewed activity began in the late 1960s, with the first landing at what is now formally recognised as Tranquility Base. Five further crewed landings followed over the next three and a half years, concluding in the early 1970s, each depositing a descent stage, a suite of scientific

instruments, and — in three cases — a lunar roving vehicle. The final crewed departure marked the last time a human being stood on the surface for several decades.

9.11.4 Robotic exploration resumed and expanded considerably in the 21st century, with multiple national programmes achieving soft landings, including the first successful landing on the lunar far side, the first landing in the lunar south polar region, and — more recently — an expanding roster of privately operated commercial landers, several of which are catalogued at Appendix C with a Register Status reflecting their less-than-fully-upright final resting position.

9.11.5 Crewed activity has, as of this printing, resumed in the form of at least one crewed lunar flyby under a modern national programme, with crewed surface landings anticipated in the years following. The Board has updated Form LRA-ARRIVE-1 accordingly and reiterates that it would very much like a response this time.

9.11.6 The Board's overall position, arrived at after considerable internal debate, is that the Association exists because people wanted to live somewhere interesting, and the Moon was interesting for a very long time before anyone lived here permanently. Part IX exists to make sure that fact is written down somewhere with the word "Section" in front of it.

§ 9.12 Future Discoveries & Newly Identified Sites

9.12.1 Should additional pre-incorporation equipment be discovered after this printing — whether through improved surface mapping, resident survey, or, as has happened twice before, a resident tripping over something while Craterscaping — the Legacy Equipment Preservation Subcommittee shall add it to the Register within one Board meeting cycle, applying the same Grandfathered status as any other entry, retroactive to its actual date of placement rather than its date of discovery.

9.12.2 A resident who identifies a previously uncatalogued item is entitled to have their name recorded in the Register as the discovering party, an honour the Board notes carries no monetary value whatsoever but has, on both occasions it has been awarded, been received with what the minutes describe as "genuine and slightly surprising enthusiasm."

PART X — Environmental & Surface Conservation Standards

§ 10.1 Regolith Conservation & Erosion Control

10.1.1 Beyond the boundary-drift concerns of § 3.2, residents are required to minimise unnecessary regolith disturbance in designated Conservation Craters, marked on the Association's surface map and maintained as undeveloped green space in the absence of anything that could be meaningfully called "green."

10.1.2 Vehicular traffic, EVA foot traffic, and construction activity within a Conservation Crater require a Surface Disturbance Permit (Form LRA-DISTURB-1). Permits are reviewed by the Craterscaping Subcommittee (§ 12.4).

10.1.3 Residents are reminded that lunar regolith, once disturbed, does not recover through natural weathering processes on any timescale relevant to a Charter provision. The Board considers this a compelling argument for caution and an equally compelling argument for not bothering to enforce this Section too aggressively, and has not fully resolved the tension.

§ 10.2 Light Pollution & Earthshine Standards

10.2.1 Exterior lighting fixtures visible from a neighbouring property between designated dark-hours (local sunset to sunrise) must be shielded, motion-activated, or otherwise compliant with the Association's Dark-Surface Design Guidance.

10.2.2 This Section exists independently of the Howling Ordinance (§ 4.1) and should not be confused with it, notwithstanding that both were originally proposed by the same resident in the same complaint letter.

§ 10.3 Seismic & Moonquake Preparedness

10.3.1 All permanent structures must be built to the Association's Seismic Resilience Standard, accounting for shallow moonquake activity consistent with data collected by the scientific instrument packages catalogued under Part IX.

10.3.2 Residents are required to maintain a minimum 72-hour emergency supply of oxygen, water, and power reserve independent of the primary utility grid, per § 11.1.

§ 10.4 Solar Flare Shelter Requirements

10.4.1 Every registered property must maintain access to a certified radiation shelter capable of housing all registered residents of that property for a minimum of 48 hours.

10.4.2 Shared shelters serving multiple crater-share properties are permitted under a Shelter-Sharing Agreement, registered with the Board and subject to the same joint-and-several liability standard applied to dust drift under § 2.4.4.

§ 10.5 Micrometeorite & Space Debris Liability

10.5.1 The Association is not liable for property damage caused by micrometeorite impact, orbital debris, or the uncontrolled re-entry of any object not registered to a resident. Residents are strongly encouraged to carry appropriate insurance under Part XIII.

10.5.2 A resident whose property becomes the unplanned final resting place of debris originating from a Pre-Association Entity's mission is entitled to notify the Board, which will add the item to the Register at § 9.2 pending review, and to nothing else.

§ 10.6 Waste Management & the Toss Zone Legacy Designation

10.6.1 Household and construction waste must be disposed of through the Association's designated Waste Consolidation Service; open dumping onto the surface constitutes a Tier 2 dust drift violation regardless of the material's origin.

10.6.2 The Board formally recognises the archaeological concept of a "toss zone" — an area near a historic landing site where crews discarded surplus equipment prior to departure — and has extended the same Buffer Zone protection at § 9.2 to each site's associated toss zone. Residents are reminded that a toss zone, however informal it may look, is a Legacy Structure area for all purposes under this Charter.

10.6.3 New toss zones may not be created. This should not need to be stated. It has been stated regardless, following an incident in which a resident attempted to register a debris pile of their own creation as a Legacy Structure. The application was denied under § 9.3.3.

§ 10.7 Noise from Environmental & Life Support Systems

10.7.1 Mechanical noise from oxygen generation, water reclamation, or climate regulation equipment is exempt from the Noise Ordinance (§ 4.1) provided the equipment is operating within its certified specifications and any shielding required by its original installation permit remains intact.

10.7.2 A resident whose life support equipment requires emergency repair generating out-of-hours noise is not in violation, but must file a routine After-Hours Maintenance Notice within 48 hours as a courtesy to neighbours who may have filed a complaint before learning the cause.

PART XI — Utilities & Infrastructure

§ 11.1 Oxygen Utility Service

11.1.1 The Association operates a shared oxygen trunk line connecting registered properties to the Central Extraction Facility. Connection is mandatory for all permanent residences; disconnection for any reason requires 30 days' written notice and Board approval.

11.1.2 Oxygen usage is metered and billed quarterly in oxygen credits, separately from HOA dues. Non-payment follows the collections process at § 6.7, with the additional provision that service may be curtailed, but never fully terminated, consistent with the Association's stated (and legally advisable) position that it does not disconnect life support over an unpaid invoice.

11.1.3 Any property seeking to install private, non-grid oxygen generation must file a Utility Independence Notice (Form LRA-UTIL-IND-1) and remains subject to the emergency reserve requirement at § 10.3.2 regardless.

§ 11.2 Water Ice Claims & Polar Resource Rights

11.2.1 Water ice deposits located within permanently shadowed polar craters are held in common by the Association and may not be individually claimed, extracted, or sold by a resident without a Polar Resource Extraction Permit.

11.2.2 The Board notes that several Pre-Association Entities have active or planned polar resource programmes within or adjacent to Association-claimed territory. Per § 9.5, the Association has notified these programmes of its resource claim. Per § 9.5, none has yet responded.

§ 11.3 Power Grid & Solar Easements

11.3.1 No structure, ornament, or Legacy Structure notwithstanding (§ 9.3) may be erected in a manner that casts a shadow over a registered solar array for more than 2 Earth hours per Earth day, without a Solar Access Variance.

11.3.2 The Association maintains a shared power grid easement of 3 metres on either side of any registered trunk cable. Encroachment into a utility easement, including by ornamental Craterscaping, is a violation under § 11.5.

§ 11.4 Communications Relay Easements

11.4.1 Properties adjacent to a registered communications relay tower or dish (including those grandfathered under § 9.4) must maintain a clear line-of-sight easement as specified by the Association's Telecommunications Subcommittee.

11.4.2 Far-side properties relying on a relay satellite for Earth communication are subject to a separate Far-Side Communications Rider, available from the Document Processing Centre, on the (so far theoretical) occasion that Far-Side enforcement per § 1.2.2 becomes practicable.

§ 11.5 Utility Easement Encroachment

11.5.1 Any structure, planting, or Craterscaping feature (§ 3.5) found within a registered utility easement is subject to removal at the resident's expense, regardless of how long the encroachment has gone unnoticed, and regardless of how nice the Board privately concedes it looks.

11.5.2 Encroachment fines follow the Unlicensed Structure schedule at § 6.2 unless the encroaching feature also violates Part X, in which case the higher fine applies.

§ 11.6 Broadband & Data Relay Service Levels

11.6.1 The Association operates a shared data relay service connecting registered properties to Earth-based networks via the Communications Relay (§ 11.4). Standard service is included in dues; Priority Bandwidth tiers are available for an additional fee, billed alongside utility charges under § 11.1.2.

11.6.2 Service interruptions caused by scheduled relay maintenance will be announced no fewer than 48 hours in advance. Interruptions caused by a dust drift event affecting relay equipment are governed by § 3.2 liability rules, applied to the offending property regardless of who actually loses service.

11.6.3 Residents relying on data relay service for remote employment, telemedicine, or other time-sensitive Earth-based obligations are encouraged to maintain a backup communications plan. The Board notes it has received this suggestion from residents more often than it has offered it.

§ 11.7 Utility Billing Disputes

11.7.1 A resident disputing a metered utility charge under § 11.1.2 may request a meter re-read within 30 days of billing. Re-reads confirming the original charge incur a 10 oxygen credit inspection fee; re-reads revealing an error result in a corrected bill and no fee.

11.7.2 Utility billing disputes are not eligible for the Fine Appeal process at § 6.8, being a metering matter rather than a compliance matter, though residents are welcome to be confused about this distinction, as several have been.

PART XII — Committees & Subcommittees

§ 12.1 Architectural Review Committee

12.1.1 Reviews all Structural Approval (§ 3.3) and exterior ornamentation (§ 3.4) submissions. Meets biweekly. Chaired by the Deputy Director of Surface Standards.

12.1.2 Turnaround time is 4–6 weeks for standard submissions and 8–12 weeks during any active investigation under Part IV. Written denials must cite the specific Charter section violated.

§ 12.2 Aesthetic Review Committee

12.2.1 A distinct body from the Architectural Review Committee, meeting quarterly to review exterior decoration flagged by neighbours or Board members under § 3.4.3. Its decisions are not, by the terms of its own charter, subject to appeal, a point the Tribunal has upheld on the several occasions it has been asked to reconsider this.

§ 12.3 Legacy Equipment Preservation Subcommittee

12.3.1 Established under this revision to administer Part IX: maintains the Register (§ 9.2), reviews Legacy Overlook tourism permits, and serves as the Association's liaison — such as it is — with Pre-Association Entities under § 9.5.

12.3.2 The Subcommittee has, on two occasions, formally proposed inviting the vacant Keeper of the Dust Drift Ledger seat to be merged into its membership, on the theory that ledger-keeping and heritage registry work draw on similar skills. Both proposals lapsed for lack of a Keeper to consult.

§ 12.4 Craterscaping Subcommittee

12.4.1 Reviews Surface Disturbance Permits (§ 10.1.2) and approved plantings, reflective gravel beds, and regolith art installations under § 3.5.4.

§ 12.5 Social Events Committee

12.5.1 Organises the Full Moon Party (§ 7.3), the Crater Cleanup Crew social hour, and the New Resident Welcome Reception. Chaired by the Director of Community Relations.

§ 12.6 Audit & Finance Committee

12.6.1 Reviews dues collection, the Reserve Study (§ 6.5), and Special Assessment proposals (§ 6.6) before they reach the full Board. Chaired by the Treasurer.

§ 12.7 Nominating Committee

12.7.1 Administers the annual Board election for available seats (§ 5.1.3), including candidate eligibility review and quorum certification for the Annual HOA Meeting.

§ 12.8 Grievance & Ethics Committee

12.8.1 Reviews complaints of Board misconduct, conflicts of interest, and any allegation that a vote should have been recused and was not. Its findings are advisory only and are, in every recorded instance to date, forwarded to the Board for a final decision by the same Board the findings concerned.

§ 12.9 Committee Meeting Cadence

12.9.1 For reference, the following table consolidates the meeting frequency and chair for each committee and subcommittee established under this Part. Full rosters appear at Appendix I.

Committee	Chair	Meets
Architectural Review Committee	Deputy Director of Surface Standards	Biweekly
Aesthetic Review Committee	At-Large Member	Quarterly
Legacy Equipment Preservation Subcommittee	Chief Albedo Officer (acting)	Monthly
Craterscaping Subcommittee	At-Large Member	Monthly
Social Events Committee	Director of Community Relations	Monthly, more often before the Full Moon Party
Audit & Finance Committee	Treasurer	Monthly
Nominating Committee	Chairperson (ex officio)	Annually, ahead of elections
Grievance & Ethics Committee	Deputy Director of Surface Standards	As needed

The Legacy Equipment Preservation Subcommittee is chaired "acting" by the Chief Albedo Officer pending resolution of a jurisdictional question the Board has not yet found time to resolve.

PART XIII — Insurance, Liability & Risk Management

§ 13.1 Mandatory Individual Coverage

13.1.1 Every registered resident must maintain an individual Lunar Habitation Policy providing no less than 500,000 oxygen credits of structural and liability coverage, naming the Association as an additional interested party.

13.1.2 Proof of current coverage must be filed annually alongside dues payment (§ 6.1). Lapsed coverage is treated as a compliance violation under § 6.3, notwithstanding that it is, unlike most violations in this Charter, not really the Board's business until something goes wrong.

§ 13.2 Association Master Policy

13.2.1 The Association separately maintains a Master Policy covering common amenities (§ 7.1), Legacy Overlook liability, and shared utility infrastructure (Part XI). The Master Policy deductible is funded through ordinary dues; a Master Policy Deductible Special Assessment may be levied under § 6.6 where a single claim exceeds budgeted reserves.

13.2.2 The Master Policy does not cover, and expressly excludes, any Legacy Structure under Part IX, on the theory that the Association did not build them, cannot maintain them, and is not prepared to explain any of this to an underwriter.

§ 13.3 EVA & Contractor Liability

13.3.1 Any resident or guest conducting an unaccompanied extravehicular activity (EVA) outside a registered property boundary does so at their own risk and is required to file an EVA Activity Notification (Form LRA-EVA-1) with the front office in advance.

13.3.2 Contractors performing Structural Approval work (§ 3.3), Crater Modification (§ 3.5), or utility installation (Part XI) must carry a minimum of 250,000 oxygen credits in third-party liability coverage and provide proof to the Association before commencing work.

§ 13.4 Indemnification

13.4.1 Each resident indemnifies the Association against claims arising from that resident's dust drift, unauthorised structures, and Full Moon Party conduct, to the fullest extent the Board's counsel has advised is enforceable, and to a somewhat fuller extent than that in the version the Board initially proposed.

§ 13.5 Claims Involving Legacy Structures

13.5.1 No Association or individual policy under this Part covers damage caused by, to, or in connection with a Legacy Structure (§ 9.3). A resident whose property is damaged by proximity to a Legacy Structure — subsidence, debris fall, or similar — must pursue relief, if any exists, outside the Association's insurance framework entirely.

13.5.2 Contractors and permit holders working within a Buffer Zone under a Heritage Filming Permit (§ 9.9.1) or Heritage-Tourism Permit (§ 7.4.3) must carry supplemental coverage naming both the Association and, where identifiable, the relevant Pre-Association Entity as additional interested parties, notwithstanding the near-certainty that the latter will not respond to the naming.

§ 13.6 Claims Arising from Committee Activity

13.6.1 Committee members acting within the scope of their committee duties (Part XII) are covered under the Association's Master Policy for liability arising from good-faith committee decisions, including Architectural Review denials, Aesthetic Review rulings, and Craterscaping Subcommittee permit reviews.

13.6.2 This coverage does not extend to a committee member's conduct outside their official capacity, nor to any decision later found by the Grievance & Ethics Committee (§ 12.8) to have involved an undisclosed conflict of interest under § 5.5.2.

§ 13.7 Environmental Risk Disclosure

13.7.1 Prior to completing a property transfer under § 2.4.2, the transferring resident must provide the incoming resident a written disclosure of known environmental risk factors affecting the property: proximity to a Conservation Crater (§ 10.1), solar flare shelter access adequacy (§ 10.4), and any pending dust drift liability determination under § 3.2.3.

13.7.2 A transfer completed without the required disclosure does not void the transfer itself but exposes the transferring resident to liability for any loss the incoming resident can demonstrate arose from an undisclosed risk, separate from and in addition to any Charter fine otherwise applicable.

13.7.3 The Lot Transfer & Resale Certificate (§ 2.4.2) is updated in this revision to include a standard Environmental Risk Disclosure section, satisfying this requirement automatically for any transfer processed through the Document Processing Centre.

PART XIV — Dispute Resolution & Neighbour Relations

§ 14.1 Mediation

14.1.1 Before any matter proceeds to the Tribunal (§ 5.4), residents are strongly encouraged to attempt informal mediation, facilitated by a Board member not otherwise involved in the dispute (or, where no such member is available, by whichever Board member is least involved).

14.1.2 Mediation sessions are scheduled within 21 days of request and are non-binding. Either party may withdraw at any time, at which point the matter proceeds to formal appeal under § 5.4.

§ 14.2 Neighbour Complaint Procedures

14.2.1 Complaints regarding a neighbour's dust drift (§ 3.2), noise (§ 4.1), or exterior decoration (§ 3.4) must be submitted in writing on Form LRA-COMPLAINT-1 and may not be submitted anonymously, except where the complaint concerns unauthorised surface writing (§ 4.5), for which anonymous tips are accepted and, per Notice on file regarding the ongoing "MONS RULE" investigation, actively encouraged.

14.2.2 Filing a complaint the Board determines to be knowingly false is itself a violation under § 4.5.1 and carries the associated fine, regardless of the underlying merits of the original dispute.

§ 14.3 The Good Neighbour Policy

14.3.1 Residents are encouraged, though not required, to introduce themselves to adjoining property owners within 30 days of establishing residency, to resolve minor boundary and dust questions informally before they become Charter matters.

14.3.2 The Board notes this Section has no enforcement mechanism and is, in the Board's own words, "the one part of this document we simply hope works."

§ 14.4 Anti-Retaliation Provision

14.4.1 A resident who files a good-faith complaint, records request, or Tribunal appeal may not be subject to retaliatory enforcement action by the Board. A resident who believes they have experienced retaliation may raise the matter with the Grievance & Ethics Committee (§ 12.8), which will forward its advisory finding to the Board for a final decision.

§ 14.5 Escalation to Multi-Association Arbitration

14.5.1 Disputes between the Association and a neighbouring lunar association (where one exists and recognises this Charter, which as of this printing remains a hypothetical circumstance) may be escalated to the Lunar Inter-Sector Council for non-binding arbitration.

14.5.2 No such dispute has arisen to date, there being no neighbouring association within enforcement range to have one with. The Board maintains this Section in anticipation of future

settlement growth and, privately, because the Section title tested well with residents during the drafting comment period.

§ 14.6 Resident-to-Resident Contracts & Private Agreements

14.6.1 Nothing in this Charter prevents two residents from entering a private agreement regarding shared Craterscaping, joint utility installation, or informal boundary understandings, provided such agreements do not purport to waive either party's Charter obligations to the Association itself.

14.6.2 The Board will not enforce a private resident-to-resident agreement as a matter of Charter compliance, and recommends residents record such agreements in writing, if only because the Tribunal has, on more than one occasion, been asked to referee a dispute over an arrangement nobody had written down.

§ 14.7 Resident Advocate Programme

14.7.1 A resident facing a Tribunal appeal (§ 5.4) or mediation (§ 14.1) may request the assistance of a Resident Advocate — a fellow resident volunteer, trained informally by the Grievance & Ethics Committee, who may accompany and advise the resident but may not speak on their behalf before the Tribunal.

14.7.2 The Advocate pool currently consists of three residents, none of whom are compensated, all of whom have expressed to the Committee that they took on the role "mostly out of curiosity about how the Tribunal actually works," which the Committee has recorded without further comment.

14.7.3 Use of a Resident Advocate does not extend any filing deadline under § 5.4.1 or § 6.8.1 and is offered purely as a courtesy to residents navigating the process for the first time.

PART XV — Digital Community & Registry Standards

§ 15.1 The Public Lunar Registry

15.1.1 The Association maintains a public digital Registry of claimed lots, resident standing (§ 2.5), and Association notices, accessible at the Association's designated public address. Registration of a lot through the Registry constitutes acceptance of this Charter under the terms of the Notice to Residents.

15.1.2 Residents are responsible for the accuracy of their own Registry profile and may update contact information at any time, though the Board notes that Association correspondence will continue to be routed to a resident's spam filter regardless of profile accuracy, per § 2.1.2.

§ 15.2 Acceptable Use of Association Digital Systems

15.2.1 Residents may not use the Registry, complaint forms, or records request system to harass another resident, impersonate a Board member (already prohibited generally under § 4.5.1), or submit knowingly false compliance data.

15.2.2 Community submissions to any Association-hosted forum, comment section, or resident story archive are subject to moderation review before publication. The Board reserves the right to decline publication without providing a reason, consistent with its general practice under § 5.2.

§ 15.3 Registry Profile & Certificate Standards

15.3.1 Upon successful lot registration, a resident is issued a Certificate of Lunar Lot Ownership, reflecting the registered coordinates, the resident's name, and their compliance obligations under this Charter. The Certificate carries no voting rights independent of quorum requirements under § 5.3.6.

§ 15.4 Records Requests

15.4.1 Registered residents may request copies of financial statements, meeting minutes, the current Reserve Study, and contractor bids through the Records Request Portal. Requests are assigned a ticket number and an estimated response time of 1–3 lunar cycles.

15.4.2 The Association is committed to transparency and processes all requests in the order received. The Board notes that "in the order received" describes a queueing methodology and should not be read as a guarantee regarding when, specifically, a request will be resolved.

§ 15.5 Data Retention & Resident Privacy

15.5.1 Registry and Directory data (§ 15.1, § 2.6) is retained for the duration of a resident's registration and for seven years thereafter, for the purpose of resolving any dues, fine, or Tribunal matter that may arise after a property transfer.

15.5.2 A former resident may request deletion of retained data after the seven-year period by written request. The Board notes it has not yet received such a request, the Association being, as of this printing, too young for one to have come due.

15.5.3 Nothing in this Section limits the Board's ability to retain Historical Incident Log entries (Appendix D) indefinitely, on the grounds that institutional memory and personal data are, in the Board's assessment, not the same category of thing.

§ 15.6 Third-Party Integrations & API Access

15.6.1 The Association may make limited Registry data available to approved third-party community tools (map overlays, compliance trackers, and similar resident-built projects) via a published data interface, subject to a Third-Party Integration Agreement.

15.6.2 Approved integrations may display public Registry data (§ 15.1) and lot standing (§ 2.5.3) but may not display Directory information (§ 2.6) or any data the Association has not itself published through official channels.

15.6.3 The Board reserves the right to revoke API access from any integration found to misrepresent Association data, and notes that this Section exists largely so that resident-built community tools have somewhere official to point when asked whether they're allowed to exist.

§ 15.7 Community Forum & Online Discussion Standards

15.7.1 Any Association-hosted or Association-endorsed community forum, comment section, or discussion channel is subject to the Acceptable Use standards at § 15.2 and moderated by volunteers appointed by the Director of Community Relations.

15.7.2 Discussion of open mysteries referenced throughout this Charter — including but not limited to the "MONS RULE" investigation, the numeric sequence noted at Appendix D, and the circumstances surrounding the Keeper of the Dust Drift Ledger's vacancy — is expressly permitted and, per the Director of Community Relations' own posted guidance, "honestly kind of encouraged, within reason."

15.7.3 Moderators may remove content that harasses a specific resident, doxes a Board member's personal Earth-based information, or claims, without basis, to have definitively solved a matter the Board has stated remains open. Good-faith theorising is not, on its own, a basis for removal.

PART XVI — Miscellaneous, Amendments & Severability

§ 16.1 Amendments to the Charter

16.1.1 This Charter may be amended by a two-thirds majority vote of the sitting Board. Proposed amendments must be submitted to the Chairperson in writing, circulated to all Board members no fewer than 7 Earth days before the vote, and presented at a regular Board meeting.

16.1.2 Residents may propose amendments by submitting a formal Resident Amendment Petition (Form LRA-AMEND-1) signed by no fewer than 25 residents in Good Standing. The Board will consider such petitions. The Board is not required to act on them, table them, or acknowledge them beyond the initial receipt confirmation.

16.1.3 Revision History:

Revision	Summary
1	Corrected a typographical error on page 3.
2	Added the Howling Ordinance following the 2089 incident.
3–6	Addressed the legal fallout from the Dust Event of 2091.
7	General consolidation and clarification; the prior standing edition of this Charter.
8	Standardised all temporal references across the Charter to the Association's adopted calendar convention, correcting a series of clerical date transpositions present in earlier drafts. Administrative in nature; no substantive obligations changed.
9	This edition. Adds Parts IX through XV in their entirety (legacy infrastructure, environmental standards, utilities, committees, insurance, dispute resolution, and digital community standards), consolidates the fine schedule and forms directory into Appendices A and B, and adds the Register of Pre-Existing Historic Surface Structures at Appendix C.

16.1.4 The Board is not optimistic that Revision 10 will not be necessary.

§ 16.2 Severability

16.2.1 If any provision of this Charter is found to be unenforceable, invalid, or inapplicable to the specific conditions of a given situation, such finding shall not affect the enforceability, validity, or applicability of any other provision.

16.2.2 The Board notes that it is not aware of any provision of this Charter that has been found unenforceable. The Board acknowledges that this may be in part because no court has yet claimed jurisdiction over the Moon. The Board considers this a feature.

§ 16.3 Governing Law

16.3.1 This Charter is governed by the internal laws and precedents of the Moon Homeowners Association, as interpreted by the Board. Where the Charter is silent, the Board's judgement

governs. Where the Board's judgement is contested, the Tribunal governs. Where the Tribunal's decision is contested, the Charter requires the contesting resident to reflect on whether this is really how they want to spend their time.

16.3.2 Earth-national and international laws do not apply within Moon HOA jurisdiction. The Board acknowledges that several Earth governments disagree with this position. The Board remains untroubled, while noting the overlapping heritage-preservation statutes referenced at § 9.8.3 as one clear exception it has voluntarily chosen to respect.

§ 16.4 The Remainder of the Document

16.4.1 Volumes II through XII of the Lunar Residential Charter contain the following:

- Volume II: Full Howling Ordinance Jurisprudence (including annotated case studies)
- Volume III: LRA-Approved Contractors, Assessors & Suppliers Directory
- Volume IV: Dust Drift Liability Matrix (Appendix Q, 847 pages)
- Volume V: Subterranean Boundary Reference Map & Geological Standards
- Volume VI: Full Schedule of Forms (LRA-001 through LRA-998; forms LRA-447 through LRA-502 reserved for future use)
- Volume VII: Tribunal Precedent Digest
- Volume VIII: Aesthetic Review Committee Rulings & Design Guidance
- Volume IX: Glossary & Defined Terms Index
- Volume X: The Full Moon Party Historical Record
- Volume XI: Oxygen Credit Exchange Rate History & Financial Statements
- Volume XII: Footnotes to Footnotes (Consolidated)

16.4.2 Residents are required to read all twelve volumes. The Board accepts that most residents will not do this. The Board will know. The Board will be disappointed. The Board's disappointment will be documented and kept on file.

§ 16.5 Construction Defect Claims & Statute of Repose

16.5.1 A claim against a contractor for defective Structural Approval work (§ 3.3) must be brought within six years of substantial completion, regardless of when the defect is discovered, consistent with the Association's adopted Statute of Repose.

16.5.2 This limitation does not apply to Legacy Structures under Part IX, which were not built under any Structural Approval process the Association could plausibly claim jurisdiction over, and against which no construction defect claim would be entertained in any case.

§ 16.6 Interpretation Aids & Headings

16.6.1 Part and Section headings throughout this Charter are provided for organisational convenience and do not themselves create, limit, or expand any substantive obligation. Where a heading and its operative text appear to conflict, the operative text governs, and the Board apologises in advance for however many times this actually comes up.

16.6.2 The singular includes the plural and the plural includes the singular throughout this Charter, except in Part IX, where the Board has been advised to be extremely specific about exactly how many lunar roving vehicles are being discussed at any given time.

§ 16.7 Entire Agreement

16.7.1 This Charter, together with all appendices, forms, and duly adopted amendments, constitutes the entire agreement between a resident and the Association regarding lunar residency, and supersedes all prior representations, whether written, verbal, or exchanged via handshake in vacuum per § 0 of the Preface.

16.7.2 Nothing in this Section is intended to diminish the continuing, if entirely unenforceable, cultural weight of the Founders' Crater Pact, which the Board reiterates it does not recognise, while also reiterating that it has now mentioned this non-recognition often enough that residents may reasonably wonder why.

A Note from the Chairperson

Thank you for reading this far. You are among the minority. Please know that the Board genuinely cares about the lunar surface and the people who inhabit it. We take our work seriously, perhaps too seriously, which is a criticism the Board has heard before and will continue to hear.

This revision was, frankly, overdue. Several of the sites now formally recognised in Part IX have been sitting quietly, undisturbed, doing more to hold this community together than most of what we've formally regulated over the years. It seemed like time they had a Section of their own.

We believe that order, maintained firmly and with care, is a kind of love. We look forward to your continued compliance.

For residents still asking about the Keeper of the Dust Drift Ledger: no, we still have not heard from them. Yes, we would tell you if we had. Probably.

— Chairperson A. Okafor

Appendix A — Full Schedule of Forms

The following is the complete directory of forms referenced throughout this Charter, plus several additional forms the Board maintains for completeness. Forms LRA-447 through LRA-502 are reserved for future use and may not be repurposed by residents in the interim, regardless of how convenient a given number might seem.

Form #	Title	Referenced In
LRA-001-E	Are You Ready for the Moon? (Eligibility Pamphlet)	§ 2.1
LRA-042-A	Application for Lunar Residential Admission	§ 2.2
LRA-042-B	Supplementary Personal Disclosure	§ 2.2
LRA-057	Request for Broom Reimbursement	Denied by default; see § 7.2
LRA-098	Notification of Intent to Hum (Non-Howling)	§ 4.1.5, informally
LRA-112	Request for Clarification of a Prior Board Response	General
LRA-131	Second Request for Clarification of a Prior Board Response	General
LRA-142	Notice of Objection to Public Posting of Standing	§ 2.5.3
LRA-155	Request to Adopt a Community Pet	Not addressed in this Charter; under committee review
LRA-166	Notice of Intent to Craterscape	§ 3.5.4
LRA-183	Voluntary Disclosure of Minor Non-Compliance	General; rarely filed
LRA-199	Notice of Intended Property Transfer	§ 2.4.1
LRA-200-S	Sublet Registration	§ 2.4.3
LRA-201-CS	Crater-Share Registration	§ 2.4.4
LRA-210	Lot Transfer & Resale Certificate Request	§ 2.4.2
LRA-300-STR	Structural Approval Application	§ 3.3.1
LRA-301-TMP	Temporary Structure Notification	§ 3.3.2
LRA-BLIGHT-1	Blight on the Collective Dignity of the Lunar Surface	§ 3.1.3
LRA-330	Aesthetic Review Committee Submission	§ 3.4.3
LRA-350	Notice of Objection to Aesthetic Review Committee Ruling	Filed; rarely successful
LRA-CRATER-MOD-1	Crater Modification Application	§ 3.5.1
LRA-442	Structural Variance Request	§ 3.3.3
LRA-AIR-001	Air Traffic Guidance Acknowledgement	§ 4.2.1

Form #	Title	Referenced In
LRA-ARRIVE-1	Pre-Arrival Notification	§ 4.2.2, § 9.7.1
LRA-NSA-1	Non-Standard Approach Waiver	§ 4.2.2
LRA-EMERG-1	Post-Arrival Emergency Landing Report	§ 4.2.3
LRA-DECLINE-001	Standard Board Declination (all-purpose)	§ 4.3.3
LRA-WRITE-1	Lunar Surface Expression Permit	§ 4.5.1
LRA-VIO-1	Violation Notice	§ 6.3.2
LRA-EXEMPT-1	Mandatory Event Exemption Request	§ 7.2.1
LRA-COMPLAINT-1	Neighbour Complaint Form	§ 14.2.1
LRA-AMEND-1	Resident Amendment Petition	§ 16.1.2
LRA-DISTURB-1	Surface Disturbance Permit	§ 10.1.2
LRA-UTIL-IND-1	Utility Independence Notice	§ 11.1.3
LRA-EVA-1	EVA Activity Notification	§ 13.3.1
LRA-JUNK-1	Junk Vehicle Notice	§ 9.6.2
LRA-GUEST-1	Guest Registration	§ 7.4.1
LRA-503	Legacy Overlook Heritage-Tourism Permit	§ 7.4.3, § 9.8.2
LRA-514	Records Request Submission	§ 15.4.1
LRA-522	Notice of Correspondence Sent to a Pre-Association Entity	§ 9.5.3
LRA-529	Notice of Non-Response from a Pre-Association Entity	§ 9.5.2, filed automatically 90 days after LRA-522
LRA-540	Solar Access Variance Application	§ 11.3.1
LRA-556	Shelter-Sharing Agreement	§ 10.4.2
LRA-571	Mediation Request	§ 14.1.1
LRA-588	Grievance & Ethics Complaint	§ 12.8.1, § 14.4.1
LRA-602	Board Candidate Nomination	§ 12.7.1
LRA-998	Final Form in Numeric Sequence (reserved, ceremonial)	None; the Board simply wanted to reach it
LRA-618	Boundary Marker Placement Notice	§ 3.6.1
LRA-620	Secondary Vehicle Variance	§ 4.6.1
LRA-627	Signage Approval Request (beyond one for-sale sign)	§ 3.7
LRA-635	Companion Organism Registration	§ 4.7.2
LRA-636	Companion Organism Variance (beyond two per household)	§ 4.7.1

Form #	Title	Referenced In
LRA-641	Palette Exception Request	§ 3.8.3
LRA-648	Board Member Removal Petition	§ 5.6.1
LRA-649	Board Candidate Financial & Familial Disclosure	§ 5.5.2

Appendix B — Master Schedule of Fines

This consolidated schedule supersedes the individual fine references scattered throughout Parts VI, IX, X, and XI for reference purposes only; in the event of any conflict between this Appendix and the operative Section of the Charter, the operative Section governs.

Violation	Section	Standard Fine
Dust drift, Tier 1	§ 3.2.2	20 OC
Dust drift, Tier 2	§ 3.2.2	60 OC
Dust drift, Tier 3 (Dust Event)	§ 3.2.2	200 OC
Albedo non-compliance, per cycle	§ 3.1.3	40 OC
Unauthorised late landing	§ 4.2.2	40 OC
Unlicensed structure	§ 3.3.1	80 OC
Howling outside permitted hours	§ 4.1.4	25 OC (35 OC during Board meetings)
Unapproved lawn ornament	§ 3.4.2	30 OC
Unauthorised additional inflatable ornament	§ 3.4.2 / § 4.5.1	100 OC
Unauthorised surface writing	§ 4.5.1	75 OC
Impersonating a Board member	§ 4.5.1	250 OC
Attempted secession	§ 4.5.1	500 OC
New monolith installation	§ 3.4.2	1,000 OC
Filing a knowingly false complaint	§ 14.2.2	150 OC
Retroactive structural approval (temporary structure over 30 days)	§ 3.3.2	80 OC plus standard fee
Crater modification without approval	§ 3.5.1	150 OC plus remediation
Filling in a crater entirely	§ 3.5.3	1,000 OC plus full restoration, where possible
Interfering with a Legacy Structure	§ 4.5.1 / Part IX	1,000 OC, minimum
Disturbing a memorial site	§ 9.3.4	2,000 OC, minimum, and immediate Tribunal referral
Operating an unregistered post-incorporation lander beyond 180 days	§ 9.6.1	300 OC (rarely collectible; see § 9.5.2)
Unpermitted disturbance in a Conservation Crater	§ 10.1.2	60 OC
Light pollution / unshielded exterior lighting	§ 10.2.1	25 OC

Violation	Section	Standard Fine
Failure to maintain solar flare shelter access	§ 10.4.1	100 OC
Utility easement encroachment	§ 11.5.1	80 OC (or higher fine if also a Part X violation)
Solar easement shadow violation	§ 11.3.1	40 OC
Communications easement obstruction	§ 11.4.1	50 OC
Lapsed individual insurance coverage	§ 13.1.2	50 OC per audit cycle
Contractor operating without proof of liability coverage	§ 13.3.2	200 OC, contractor barred pending compliance
Harassment or impersonation via Association digital systems	§ 15.2.1	150 OC
Submission of knowingly false compliance data to the Registry	§ 15.2.1	200 OC
Late dues, 30–60 days	§ 6.1.2	15 OC surcharge
Late dues, 60–90 days	§ 6.1.2	additional 20 OC surcharge
Late dues, 90+ days	§ 6.1.2	Strongly Worded Letter, formal review, collections referral
Boundary marker tampering	§ 3.6.3	80 OC, treated as § 4.5.1 conduct
Unapproved fencing beyond marker	§ 3.6.2	30 OC
Signage beyond size or timing limits	§ 3.7.1	20 OC
Unapproved exterior finish (Palette violation)	§ 3.8.1	30 OC
Unregistered secondary vehicle	§ 4.6.1	40 OC
Vehicle idling in a utility easement	§ 4.6.3	80 OC (encroachment) plus 40 OC (parking)
Unregistered companion organism	§ 4.7.2	25 OC
Companion organism beyond household limit	§ 4.7.1	50 OC per additional organism
Board member missed-meeting non-compliance	§ 5.5.3	Not a fine; committee assignment removal
Retaliatory enforcement action (found by Grievance Committee)	§ 14.4.1	No standard fine; Board censure
Heritage filming without permit	§ 9.9.1	500 OC
Failure to report uncatalogued Legacy item	§ 9.10.2	500 OC
Removal or possession of a Register item	§ 9.10.1	2,000 OC, minimum, and Tribunal referral

Violation	Section	Standard Fine
Unauthorised surface dumping	§ 10.6.1	60 OC, treated as Tier 2 dust drift
Registering a self-created toss zone	§ 10.6.3	150 OC and denial of Legacy Structure status
Short-Term Occupancy without permit	§ 7.5.1	100 OC
Heritage-tourism short-term let without sign-off	§ 7.5.3	150 OC
Holiday decoration outside display window	§ 7.6.1	20 OC
Data submitted to Registry known to be false	§ 15.2.1	200 OC
Directory information shared without consent	§ 2.6.3	Not applicable to residents; Board policy only
Third-party integration data misuse	§ 15.6.3	API access revoked; 150 OC if resident-operated
Utility meter tampering	§ 11.7.1	300 OC and immediate service review
Failure to file After-Hours Maintenance Notice	§ 10.7.2	15 OC, waived on first occurrence
Reservation deposit forfeiture (Community Hall / Legacy Overlook)	§ 7.8.2	10 OC (the deposit itself)
Environmental Risk Disclosure omitted at transfer	§ 13.7.2	Liability for demonstrated loss, plus standard transfer fine
Speaking on behalf of a resident before the Tribunal without authorisation (unauthorised Advocate conduct)	§ 14.7.1	50 OC, Advocate pool suspension
Forum content doxxing a Board member's Earth-based information	§ 15.7.3	Immediate removal; 300 OC if traced to a specific resident

Careful readers will notice that the fine for unauthorised surface writing appears here as 75 OC, while § 6.2 lists it as 50 OC. The Board has reviewed this discrepancy and would like to note that it is either a clerical error or a test. It has not decided which.

Appendix C — Register of Pre-Existing Historic Surface Structures

Maintained by the Legacy Equipment Preservation Subcommittee (§ 12.3) pursuant to Part IX. Coordinates are given in planetocentric degrees, rounded, and provided for informational purposes; residents are reminded that the Legacy Buffer Zone applies regardless of a visitor's ability to independently verify these figures.

Site	Approx. Coordinates	Origin & Era	Contents (selected)	Buffer Zone
Tranquility Base	0.67°N, 23.47°E	United States, first crewed landing, late 20th c.	Descent stage, flag, seismometer, laser-ranging retroreflector, tools, and an estimated 100+ smaller discarded items	500 m
Ocean of Storms site	3.01°S, 23.42°W	United States, late 20th c.	Descent stage, instrument package; a nearby robotic probe was visited and partially sampled by the crew	300 m
Fra Mauro highlands site	3.65°S, 17.47°W	United States, early 1970s	Descent stage, instrument package, and two recreational sporting items left during an unscheduled demonstration	300 m
Hadley Rille site	26.13°N, 3.63°E	United States, early 1970s	Descent stage, first lunar roving vehicle, a small memorial sculpture and plaque, and apparatus from a public physics demonstration	300 m; memorial under § 9.3.4
Descartes Highlands site	8.97°S, 15.50°E	United States, early 1970s	Descent stage, second lunar roving vehicle, and a personal family photograph left by a crew member	300 m
Taurus-Littrow site	20.19°N, 30.77°E	United States, early 1970s	Descent stage, third lunar roving vehicle, commemorative plaque, and surface inscriptions left by the final crew to walk on the surface	300 m
Multiple sites, near side	Various	Soviet Union / Russian Federation, mid-late 20th c.	Robotic landers and two teleoperated rovers; two retroreflectors still used in active laser-ranging work	200 m each
Multiple sites, incl. one far-side	Various	China (CNSA), 21st c.	Robotic landers and rovers, including the first successful far-side soft landing and two robotic sample-return missions	200 m each; far-side site outside enforcement range, § 1.2.2
South polar region site	Southern, exact coordinates restricted	India (ISRO), 21st c.	Robotic lander and rover, first successful soft landing in the lunar south polar region	200 m

Site	Approx. Coordinates	Origin & Era	Contents (selected)	Buffer Zone
Multiple commercial sites	Various	Private aerospace companies, multiple nations, 21st c.	A growing set of robotic landers, several resting at an angle the Board considers structurally undignified	150 m each; see § 9.6.3
Scattered impact & debris sites	Various, uncatalogued below 50kg	Multiple, mid-20th c. onward	Discarded rocket stages and uncontrolled impact debris	Not individually buffered; see § 10.5.2

Tranquility Base remains the most-visited site under the Legacy Overlook program (§ 7.1) and receives the strictest Buffer Zone enforcement of any entry on this Register, reflecting both its historical primacy and the sheer density of catalogued material — well over one hundred individually significant items within a relatively compact footprint, per the most recent independent survey the Subcommittee has reviewed.

The memorial installation at the Hadley Rille site receives protection under § 9.3.4 distinct from, and stricter than, the general Legacy Structure exemption. The Subcommittee's internal guidance describes it simply as "a small private tribute the crew chose to leave, and not the Association's place to comment on further," which is the closest this Charter comes, anywhere, to an unqualified statement of restraint.

The Subcommittee notes that several commercial landing attempts catalogued above did not conclude in the manner their operators had planned. The Register does not distinguish between a mission's scientific success and its final resting angle; both a flawless two-week research campaign and an unplanned tip onto one side receive identical Grandfathered status once the 30-day New Arrivals window under § 9.7 has closed without a removal request.

Site Notes (Selected)

Tranquility Base. Beyond the descent stage and flag, the catalogued material at this site includes a boot-print field the Subcommittee's guidance describes as "the single most consequential set of footprints presently within Association jurisdiction," a passive seismic instrument that operated for a little over a month before its design life expired, and a small silicon disc bearing miniaturised goodwill messages contributed by dozens of nations, sealed in a container and left near the descent stage. The Subcommittee's official position is that this last item is, whatever else may be said about the site, a nice thing to have done.

Ocean of Storms site. Located within a few hundred metres of a robotic probe that had soft-landed several years earlier, this site is notable for the crew's brief visit to that older probe, from which several components were removed for return to Earth and long-term-exposure study. The Register treats the robotic probe and the crewed descent stage as a single combined entry, on the theory that they have, by now, been neighbours for longer than most residents have been alive.

Fra Mauro highlands site. In addition to the standard descent stage and instrument package, this site hosts two small recreational items associated with an unscheduled demonstration conducted near the end of the mission's final moonwalk. The Subcommittee notes, dryly, that this appears to be the only item on the entire Register that a resident has ever expressed genuine enthusiasm about locating in person.

Hadley Rille site. Beyond the memorial installation addressed at § 9.3.4, this site includes the first lunar roving vehicle ever deployed, and was the location of a brief public physics demonstration in which a crew member released a lightweight object and a dense one simultaneously to illustrate that, absent atmosphere, both fall at the same rate. The demonstration is referenced obliquely in the Association's own science curriculum for the Craterscaping Subcommittee's youth outreach sessions.

Descartes Highlands site. This site is one of two on the Register to include a personal item of a distinctly domestic character: a small photograph, left by a crew member, depicting his own family. The Subcommittee has fielded more Records Requests about this single item than about any other entry on the Register, and has adopted a standard response directing curious residents to Earth-published sources rather than attempting to describe the photograph itself.

Taurus-Littrow site. The final crewed landing site prior to the multi-decade pause in human surface visits, this location includes the third and final lunar roving vehicle, a commemorative plaque affixed to the descent stage, and a set of initials scratched into the regolith by the mission commander on behalf of his daughter, reportedly the last human mark made on the surface before departure. The Subcommittee has classified this inscription as a memorial rather than unauthorised surface writing, distinguishing it from the ongoing "MONS RULE" matter at § 4.5.1 on grounds of both age and, in the Subcommittee's words, "obvious intent."

Site Notes: International Robotic Missions

The Register's Soviet-era entries include the first two vehicles to be remotely driven across another world's surface, operated from Earth-based control centres over the course of separate multi-month missions each still credited with unprecedented distances at the time. Both vehicles are, as of this printing, targets of active laser-ranging measurement, making them, alongside the retroreflectors left at several of the Apollo sites, some of the only Register entries still in daily scientific use.

The far-side landing site catalogued under this Register represents the first successful soft landing on the lunar hemisphere permanently facing away from Earth, made possible only through a dedicated relay satellite positioned to maintain communication around the Moon's curve. The Association's own enforcement limitations regarding the Far Side (§ 1.2.2) apply here with a certain irony the Legacy Equipment Preservation Subcommittee has acknowledged in its minutes without further comment.

The south polar region site represents the first successful soft landing in that specific region by any programme, robotic or crewed, and sits within a stretch of near-permanent shadow that the Association's own Water Ice Claims (§ 11.2) treat as a distinct resource zone. The Subcommittee

has noted, diplomatically, that resource policy and heritage policy will eventually need to be reconciled in more detail than this Charter currently provides.

The commercial landing sites catalogued in this Register span multiple companies and multiple nations of origin, reflecting a sharp increase in non-governmental lunar activity in the years leading up to incorporation. The Subcommittee's working assumption is that this category of the Register will grow faster than any other in the years following this printing, and has requested additional resourcing accordingly.

Appendix D — Historical Incident Log

Maintained for institutional memory and, on the Board's own admission, a certain amount of catharsis. Entries are drawn from Board minutes, resident complaints, and correspondence records.

Year	Incident
2084	The informal understanding later known as the Founders' Crater Pact is reached between the earliest residents. Never formally recognised by any subsequent Board.
2086	The Great Regolith Incident: a single unchecked dust drift contaminates fourteen craters and three oxygen gardens. Emergency Board session convened, lasting eleven months.
2088	The Lunar Residential Charter is ratified, Lunar Cycle 1, Day 1. The Association discovers, during incorporation proceedings, that it has inherited jurisdiction over a considerable quantity of pre-existing surface equipment. Part IX is drafted six revisions later.
2088	First recorded correspondence sent to a Pre-Association Entity regarding an inoperative structure. No response received. Filed under Form LRA-529 for the first of many times.
2089	Full Moon Party incident involving an unregistered inflatable ornament. Origin of the current inflatable-ornament restriction (§ 3.4.2) and the Howling Ordinance's formal codification.
2090	A second Full Moon Party incident, of a similar character to 2089, prompting the Board to note in its minutes that "a pattern may be emerging" regarding inflatable ornaments specifically.
2090	First confirmed sighting of the phrase "MONS RULE" inscribed on the visible lunar surface. Investigation opened. Investigation remains open.
2091	The Dust Event of 2091: regolith migration exceeding 3 metres from a single property, triggering Revisions 3 through 6 of the Charter and a comprehensive rewrite of the Dust Drift Liability Matrix.
2091	The Incident of 2091: a resident is found to have filed a knowingly false dust drift complaint against a neighbour. Referenced without further elaboration at § 14.2.2 to this day.
2092	Second confirmed sighting of "MONS RULE." The Board notes the sighting occurred at a location consistent with, though not proving, prior resident theories regarding a specific suspect. The Board declines to elaborate.
2092	The Keeper of the Dust Drift Ledger position becomes vacant under circumstances the Board has not fully documented in any record available to residents. A resignation note, unsigned, is found pinned to the Ledger itself. Applications are not currently being accepted.
2092	A sequence of numbers is found stamped in the margin of the final Ledger page: 23-5-11-14-15-23. Filed as a printing artifact. Not otherwise explained.
2093	Revision 8 is adopted, standardising temporal references across the Charter. Administrative in nature. The Board declines to elaborate on what, specifically, prompted this revision at this particular time.
2093	Third confirmed sighting of "MONS RULE," this time accompanied by a second, shorter inscription the Board has elected not to reproduce in this Log.
2093	An unconfirmed resident sighting of an individual matching the former Keeper's description is reported at that year's Full Moon Party. The individual reportedly declined to comment and left before the seating chart could be consulted.

Year	Incident
2094	This revision (Revision 9) is adopted, formally recognising the Register of Pre-Existing Historic Surface Structures and incorporating Parts IX through XV.
2089	First Structural Approval application for a property adjacent to a Legacy Structure. Approved, prompting the Board to realise it had no framework for such applications and to begin drafting what eventually became Part IX.
2089	The Association's first Special Assessment, levied to fund emergency Reflectivity Audit equipment following the Great Regolith Incident's lingering effects on surface visibility.
2090	The Best Decorated Property judging controversy (see § 7.6.3 and Appendix J, Specimen 2). The award is discontinued the same year.
2090	First resident-filed Records Request. Assigned ticket number 001. Resolved in 2091.
2090	A resident attempts to register a self-created debris pile as a Legacy Structure. Denied. The attempt is nonetheless memorialised at § 10.6.3.
2091	First Reserve Study commissioned. The Zero-Gravity Swimming Pool's Reserve Component is found critically underfunded, a status that has not materially improved since.
2091	First Short-Term Occupancy Permit issued. The property in question is, coincidentally, one lot away from the Legacy Overlook, prompting the proximity sign-off requirement now codified at § 7.5.3.
2092	The Association's Communications Relay easement is formally surveyed for the first time, following a dispute over a satellite dish later resolved by the carve-out at § 9.4.
2092	A commercial lander arrives off-target and comes to rest at a considerable angle within Association-claimed territory. Catalogued the following year as Non-Conforming, No Enforcement Action Available.
2093	First Heritage Filming Permit issued, to a documentary production the Board declines to name in this Log, citing an ongoing (and, the Board admits, one-sided) licensing correspondence.
2093	The Grievance & Ethics Committee receives its first Board Member Removal Petition. Signature threshold not met.
2093	The Craterscaping Subcommittee completes the first Conservation Crater planting under § 10.1, using approved regolith art techniques rather than anything that could accurately be called a plant.
2094	The Legacy Equipment Preservation Subcommittee formally proposes merging the vacant Keeper of the Dust Drift Ledger seat into its own membership, for the second time. The proposal again lapses for lack of a Keeper to consult.
2094	The Association's data relay service experiences its first extended interruption attributable to a Tier 3 dust drift event affecting relay equipment, per § 3.2 and § 11.6.2 liability rules.
2089	First Tribunal case decided in a resident's favour on appeal (later catalogued as the Silent Howl case, Appendix L). The Board's minutes describe the outcome as "correct, if inconvenient."
2090	The Retroactive Structure Case (T-2090-008) prompts the Board to adopt a standing fee-waiver practice for documented equipment delays, its first meaningful concession in an appeals matter.
2092	The Crater-Share Liability Case (T-2091-002) is decided, upholding joint-and-several liability. Several crater-share arrangements are quietly renegotiated in its aftermath.
2093	The Emergency Landing Paperwork Case (T-2093-011) is decided against the appellant, prompting renewed and unsuccessful resident requests for a documented-emergency grace period.

Year	Incident
2094	The Directory Opt-Out Case (T-2094-005) is decided, clarifying that § 2.6 and § 14.3 operate independently of one another.
2094	The Revision 9 Comment Period Case (T-2094-018) is decided against the appellant, though the Tribunal's sympathetic language is quoted approvingly by several residents in subsequent Records Requests.
2094	The first Compliance Rebate under § 6.9 is issued, to a resident who has maintained Good Standing continuously since 2091. The Board's minutes describe the moment as "a nice change of pace."
2094	The Reflectivity Assistance Programme (§ 3.9) receives its first application, exceeding available Reserve Component funding within the same fiscal quarter.
2094	The Resident Advocate Programme (§ 14.7) is formally established following informal use of the practice for at least two prior Tribunal appeals.
2094	The Community Forum's moderation guidance (§ 15.7) is published, explicitly permitting continued discussion of the Association's several outstanding mysteries, to what the Director of Community Relations described as "an unusually enthusiastic response."

Appendix E — Glossary & Defined Terms

Consolidated from definitions scattered throughout this Charter and Volume IX, for residents unable to locate Volume IX.

Term	Definition
Good Standing	A resident's compliance status under § 2.5; required for full amenity access and committee eligibility.
Grandfathered Non-Conformance	A structure or condition exempt from a current Charter provision because it predates the provision. See § 1.4.
Legacy Structure	Any structure placed on the surface prior to incorporation in 2088. See Part IX.
Pre-Association Entity	A government, agency, or company that conducted lunar activity prior to incorporation and has not since registered as a Resident. See § 9.5.
Constructive Delivery	The Board's position that non-response to correspondence constitutes delivery. Untested outside Board minutes. See § 9.5.2.
Reserve Component	A discrete category of shared infrastructure tracked for funding-adequacy purposes. See § 6.5.
Special Assessment	A one-time charge levied to cover a Reserve Component shortfall. See § 6.6.
Junk Vehicle Ordinance	The provision applying inoperative-vehicle standards to derelict landers and rovers. See § 9.6.
Buffer Zone	The minimum distance maintained around a Legacy Structure under the Lunar Heritage Preservation Accord. See § 9.8, Appendix C.
Conservation Crater	A crater designated as undeveloped green space, subject to Surface Disturbance Permitting. See § 10.1.
Craterscaping	Cultivation of approved surface plantings, gravel beds, or regolith art within a crater rim. See § 3.5.4, § 12.4.
Utility Easement	The reserved corridor around a registered utility line or relay, within which encroachment is prohibited. See Part XI.
Master Policy	The Association's shared insurance coverage for common amenities and infrastructure. See § 13.2.
Mediation	Non-binding, informal dispute resolution preceding Tribunal appeal. See § 14.1.
Records Request	A resident's request for Association financial, meeting, or reserve documentation. See § 15.4.
Registry	The Association's public digital record of claimed lots, standing, and notices. See § 15.1.
Sol Cycle	One full lunar day-night period, approx. 708.7 Earth hours. See § 4.3.
Non-Conforming, No Enforcement Action Available	A Register status applied to certain post-incorporation landers. See § 9.6.3.

Term	Definition
Toss Zone	An area near a historic landing site where surplus equipment was discarded prior to departure. Treated as an extension of the site's Buffer Zone. See § 10.6.2.
Heritage Filming Permit	Required for commercial photography, filming, or livestreaming within a Legacy Structure's Buffer Zone. See § 9.9.1.
Statute of Repose	The six-year outer limit on construction defect claims, running from substantial completion regardless of discovery. See § 16.5.1.
Companion Organism	A pet or similar animal kept by a resident, subject to registration and household limits. See § 4.7.
Secondary Vehicle Variance	Required to keep more than two visible registered vehicles on a property. See § 4.6.1.
Palette Exception	Board approval to use an exterior finish not on the Approved Material Palette. See § 3.8.3.
Good Standing	See earlier entry; cross-referenced here as it also governs eligibility to hold a Short-Term Occupancy Permit. See § 2.5, § 7.5.
Constructive Delivery	See earlier entry. Also invoked, without success, in the Board's correspondence with commercial lander operators. See § 9.5.2, § 9.6.2.
Lunar Inter-Sector Council	The hypothetical body for multi-association arbitration. Not yet convened for lack of a second association. See § 14.5.
Directory	The internal, access-restricted resident contact record, distinct from the public Registry. See § 2.6.
Priority Bandwidth	An optional, additional-fee tier of the Association's data relay service. See § 11.6.1.
Board Candidate Disclosure	The financial and familial interest disclosure required of Board nominees. See § 5.5.2.
Removal Petition	The 40%-signature mechanism for removing a sitting Board member other than the Chairperson. See § 5.6.1.
Welcome Packet	The materials issued to a new resident upon completing the Oath Ceremony. See § 7.7.
Approved Material Palette	The six recognised exterior finishes, plus any approved exceptions. See § 3.8.2.

Appendix G — Approved Lunar Holiday Schedule

The following eleven holidays are recognised by the Association for the purposes of Howling Hours (§ 4.1.3) and Holiday Decoration Standards (§ 7.6). Dates are given relative to Sol Cycle numbering; residents relying on UTC for all other Charter purposes should convert accordingly.

Holiday	Observed	Notes
Incorporation Day	Lunar Cycle 1, Day 1	Marks the ratification of the original Charter. Attendance at the commemorative reading of Part I is encouraged, not mandatory.
Full Perigee	Varies (nearest lunar approach)	Extended howling window; see § 4.1.3.
Lunar New Year	First new Earth-visible moon of the Earth calendar year	Traditionally marked with a Craterscaping bulb-planting event, weather (such as it is) permitting.
Mons Memorial Day	Anniversary of the first "MONS RULE" sighting	Officially commemorates "community expression through the ages." Unofficially, everyone knows what this is actually about.
Reflectivity Day	Day following the Annual Reflectivity Audit	A rest day for Surface Assessors. Residents are asked not to schedule ARC submissions on this date.
Founders' Remembrance	Anniversary of the Founders' Crater Pact	Commemorates an agreement the Board has never formally recognised. Observed anyway.
Regolith Remembrance Day	Anniversary of the Great Regolith Incident	A quiet day. No howling permitted regardless of § 4.1.3 scheduling.
Heritage Day	Added this revision	Newly established under Part IX to mark the formal recognition of the Register of Pre-Existing Historic Surface Structures. Residents are encouraged to visit the Legacy Overlook.
Founders' Crater Pact Day	See Founders' Remembrance	Listed separately in earlier editions due to a clerical duplication the Board has elected not to correct, for continuity.
Tribunal Recess	First Saturday following the Annual HOA Meeting	The Tribunal does not hear appeals on this date. Filing deadlines are unaffected.
Full Moon Party	Saturday nearest Earth-visible Full Moon	See § 7.3 for the complete list of rules and expectations.

Appendix H — Board Correspondence Log with Pre-Association Entities

A representative sample of correspondence sent under § 9.5, maintained for transparency and institutional record. Recipient organisations are referred to generically, consistent with the Board's general practice of not naming specific agencies in outbound correspondence, on advice of counsel.

Date	Recipient	Subject	Response
2088	Operator, Tranquility Base equipment	Welcome notice and courtesy explanation of Association jurisdiction	None received
2089	Operator, Ocean of Storms equipment	Request for Structural Approval retroactive filing, waived same letter under § 9.3	None received
2090	Operator, multiple polar landers	Notice of Association's Water Ice Claim under § 11.2	None received
2091	Operator, Hadley Rille equipment	Notice regarding memorial protection status under § 9.3.4, offered as a courtesy rather than a requirement	Acknowledged via unrelated public statement, not addressed to the Association directly
2092	Operator, various commercial landers	Junk Vehicle Notice (Form LRA-JUNK-1) regarding a non-upright lander	None received
2093	Operator, an active crewed lunar programme	Pre-Arrival Notification request (Form LRA-ARRIVE-1) ahead of an announced flyby	None received; flyby proceeded without Association coordination
2094	Multiple recipients	General notice of Revision 9 and the formal Register at Appendix C	Pending; Form LRA-529 not yet triggered as of this printing

The Board wishes to note, for any Pre-Association Entity reading this Charter for the first time, that the door remains open and the Document Processing Centre keeps regular if unspecified hours.

Specimen Correspondence: Sent 2092, Re: Junk Vehicle Notice

To Whom It May Concern: The Association writes regarding surface equipment registered to your organisation, currently resting at an angle the Board's Compliance Office has classified as "non-upright" following its arrival within our jurisdiction. Under § 9.6 of the Lunar Residential Charter, equipment that has ceased operation and remained stationary and unregistered for more than 180 Earth days is subject to the Association's Junk Vehicle Ordinance. You are granted 90 days to restore the equipment to operational status, register it as a permanent installation, or arrange removal. The Board recognises that your organisation may not consider itself subject to this Charter. The Board would

*nonetheless appreciate a response, if only to update its records. Respectfully,
The Board of Directors, Moon Homeowners Association*

Specimen Correspondence: Sent 2094, Re: Revision 9 General Notice

To Whom It May Concern: The Association is pleased to inform you that, as of this printing, your organisation's historic surface equipment has been formally added to our Register of Pre-Existing Historic Surface Structures (Appendix C) and now enjoys full Grandfathered protection under Part IX of our Charter. This protection was, admittedly, already something the Board intended to extend regardless of your response to prior correspondence. We are notifying you now chiefly so that, should you ever wish to discuss Buffer Zone coordination, heritage tourism permitting, or simply introduce yourselves, you will know that a Charter provision exists for exactly that purpose. We remain, as always, available at the Document Processing Centre during hours we are actively working to formalise. Warm regards, Adaeze Okafor, Chairperson

Specimen Correspondence: Sent 2093, Re: Upcoming Crewed Flyby Coordination

To Whom It May Concern: The Board understands, from publicly available Earth-based reporting rather than any direct notice to this Association, that your programme intends to conduct a crewed lunar flyby in the near future. We write to request, as a courtesy and not as a legal demand the Board is under any illusion it could enforce, that any subsequent landing attempt include a completed Pre-Arrival Notification (Form LRA-ARRIVE-1, enclosed) so that our Air Traffic Guidance under § 4.2 may be observed and any resulting equipment properly registered under § 9.7 rather than left for a future Board to sort out. We recognise this letter will likely receive the same reception as our prior correspondence. We are sending it anyway. Some traditions are worth keeping. Respectfully, The Board of Directors, Moon Homeowners Association

Appendix I — Committee Rosters

Full membership of each committee and subcommittee established under Part XII, current as of this printing.

Committee	Members
Architectural Review Committee	Tobias Renn (Chair), one appointed resident representative, one rotating At-Large designee
Aesthetic Review Committee	Ingrid Solheim (Chair), two appointed resident representatives
Legacy Equipment Preservation Subcommittee	Priya Anand (Acting Chair), one resident historian volunteer, one seat reserved pending resolution of § 12.3.2
Craterscaping Subcommittee	Ingrid Solheim (Chair), two resident volunteers
Social Events Committee	Youssef Haddad (Chair), three resident volunteers
Audit & Finance Committee	Marcus Ilves (Chair), one resident volunteer with relevant Earth-based accounting experience
Nominating Committee	Adaeze Okafor (ex officio Chair), Tobias Renn, Youssef Haddad
Grievance & Ethics Committee	Tobias Renn (Chair), two resident volunteers not currently serving on any other committee

Alternate members are drawn from a standing pool of resident volunteers maintained by the Nominating Committee and activated when a primary member recuses under § 5.5.2 or is unavailable for a scheduled meeting. The pool currently numbers six residents, a figure the Nominating Committee considers adequate but is actively working to grow ahead of next year's committee cycle.

Appendix J — Specimen Instruments

The following specimens are provided so residents know what to expect upon receiving similar correspondence. Names used below are illustrative only and do not refer to any actual resident, living or otherwise.

Specimen 1: A Strongly Worded Letter

Dear Resident, It is with genuine reluctance, and no small amount of institutional disappointment, that the Board writes to you regarding the condition of your registered property as observed during the most recent Reflectivity Audit. Your property was recorded at an albedo of 9.4%, placing it below the Charter's minimum threshold of 12% under § 3.1.1, and regrettably within the range the Board is required, by its own governing document, to describe as a Blight on the Collective Dignity of the Lunar Surface. The Board does not use this language lightly. The Board did not, in fact, choose this language at all; it was adopted by a two-thirds vote of a prior Board and the current Board is bound by it regardless of its own preferences in the matter. You are required to achieve compliance within 30 Earth days of this notice. The Board trusts this will not be necessary to repeat, though it acknowledges, in the interest of transparency, that it has said this before, to you specifically, on two prior occasions. The Board remains, as ever, cordially and firmly yours, Adaeze Okafor, Chairperson Tobias Renn, Deputy Director of Surface Standards [Position Vacant — Intent Endorsed], Keeper of the Dust Drift Ledger

Specimen 2: Tribunal Precedent Summaries

Case No. T-2091-014, Resident v. The Board ("the Reflectivity Additive Case"). The appellant argued that a reflective additive applied to improve albedo compliance under § 3.1.4 should not require separate Palette approval under § 3.8. The Tribunal agreed, holding that reflective additives applied solely for compliance purposes are exempt from Palette review provided the underlying colour remains on the Approved Palette. This holding is now codified at § 3.8.4.

Case No. T-2092-003, Resident v. The Board ("the Boundary Marker Case"). The appellant argued that a neighbour's boundary marker had been placed 40 centimetres onto the appellant's registered property. The Board's own imagery review was inconclusive. The Tribunal declined to resolve the underlying boundary dispute, holding instead that self-help relocation of a disputed marker is prohibited regardless of the marker's accuracy, and referred the parties to mediation under § 14.1. The parties are, as of this printing, still in mediation.

Case No. T-2093-021, Resident v. The Board ("the Best Decorated Property Case"). Following the 2090 holiday decoration judging controversy referenced at § 7.6.3, the appellant challenged the scoring methodology used by the (now-discontinued) Best Decorated Property award. The Tribunal declined to rule on the merits, on the basis that the award itself had been withdrawn before the appeal could be heard, rendering the matter moot. The Tribunal noted, in an aside the Board did not request, that it had found the original scoring methodology "difficult to defend on its own terms."

Specimen 3: An Architectural Review Committee Denial

*RE: Submission #ARC-2094-0187 (Regolith-yard display, proposed height 3'4")
Your submission is denied per § 3.4.2 (height restriction, maximum 91.44 cm / 36 in). Your proposed display exceeds this limit by approximately 10 centimetres. You may resubmit at or below the approved height, or appeal this determination to the full Board at the next Monthly General Assembly per § 3.4.3. The Committee notes, without prejudice to its decision, that the display in question appears to be a decorative satellite dish. Should it in fact be a functional relay antenna under one metre in diameter, it may qualify for the carve-out at § 9.4.1, in which case this denial would not apply and you are encouraged to say so on resubmission.*

Appendix K — Cross-Reference Index

An alphabetical index of topics addressed in this Volume, for residents who prefer to look things up rather than read start to finish. This index is limited to Volume I; Volumes II through XII maintain their own indices, which the Board has not cross-checked against this one and cannot vouch for.

Topic	Section
A Brief History of Activity Prior to Incorporation	§ 9.11
Acceptable Use of Association Digital Systems	§ 15.2
Aesthetic Review Committee	§ 12.2
Albedo Compliance	§ 3.1
Amendments to the Charter	§ 16.1
Annual HOA Dues	§ 6.1
Anti-Retaliation Provision	§ 14.4
Appeals & the Tribunal	§ 5.4
Application of the Junk Vehicle Ordinance to Derelict Landers & Rovers	§ 9.6
Application Procedures	§ 2.2

Appendix L — Excerpt from Volume II: Selected Howling Ordinance Case Studies

Volume II of this Charter contains the complete Howling Ordinance Jurisprudence in full. The following three case studies are reproduced here, in Volume I, as illustrative examples for residents unlikely to request the complete Volume.

Case Study 1, "The Anniversary Howl." A resident sought a standing exception to howl on the anniversary of a personal milestone falling outside the permitted hours at § 4.1.3. The Board denied the request, noting that permitting one recurring personal exception would require the Association to adjudicate the relative significance of every resident's personal milestones, a task the Board described in its ruling as "not something the Compliance Office is equipped, staffed, or in all honesty inclined to do."

Case Study 2, "The Harmony Defence." Two adjoining residents were each cited for Tier 1 howling violations arising from what both described as a single, coordinated, mutually agreed howl conducted jointly across their shared boundary. The Board upheld both citations, reasoning that coordination between violators does not convert two violations into one, and additionally noted that the coordination itself, having been planned in advance, undercut any claim that the howling was spontaneous or compulsive in nature.

Case Study 3, "The Silent Howl." A resident argued that a howl conducted entirely within a sealed helmet, inaudible to any neighbour by any means, could not constitute a Charter violation given the Ordinance's own acknowledgment (§ 4.1.1) that enforcement rests on perceptibility. The Board agreed, in what remains the Ordinance's only resident-favourable ruling on record, and the case is now cited internally as authority for the proposition that a howl no one can hear is not, for Charter purposes, a howl at all.

Case Study 4, "The Relay Howl." A resident was cited after a neighbour reported hearing howling relayed, apparently unintentionally, through a shared communications relay easement rather than through direct atmospheric or structural conduction. The Board upheld the citation, holding that § 4.1.2's definition of noise ("perceived, received, or intuited") does not require a conventional acoustic pathway, and that a relay is, for these purposes, simply a very long wall.

Case Study 5, "The Off-Cycle Howl." A resident argued their howl, though outside standard permitted hours, occurred during what they believed in good faith to be an Approved Lunar Holiday under Appendix G. The holiday in question had, in fact, concluded the prior Sol Cycle. The Board reduced the fine by half in recognition of the good-faith calendar error but declined to waive it entirely, noting that Circadian Compliance (§ 4.3) places the burden of correct dating on the resident.

Appendix M — Specimen Association Notices

Two further specimens, provided for residents who have not yet received either in the ordinary course of Association business and, the Board suspects, would like to know what to expect.

Specimen 4: A Special Assessment Notice

NOTICE OF SPECIAL ASSESSMENT Pursuant to § 6.6 of the Lunar Residential Charter, the Board hereby levies a Special Assessment against all registered properties in the amount of 85 oxygen credits, due no sooner than 45 days from the date of this notice. Reason for Assessment: The Zero-Gravity Swimming Pool Reserve Component is currently funded at 11% of its recommended target, a figure the most recent Reserve Study classifies as a critical shortfall. This Special Assessment is intended to fund location and recovery efforts, and, contingent on recovery, structural recertification. Payment plans of 12 to 24 lunar cycles are available on written request. Properties with an outstanding balance 45 days past this due date will enter the collections process at § 6.7. The Board regrets the necessity of this Assessment and wishes to note, for context, that the pool's disappearance predates the current Board's term by a considerable margin.

Specimen 5: Reserve Study Summary Excerpt

RESERVE STUDY SUMMARY (Excerpt) — Prepared for the Audit & Finance Committee Reserve Component: Moonwalk Trail — Funded at 68% of target. Adequate. No action recommended at this time. Reserve Component: Community Hall — Funded at 74% of target. Adequate. Reserve Component: Zero-Gravity Swimming Pool — Funded at 11% of target. Critical shortfall. See accompanying Special Assessment Notice. Reserve Component: Solar Tanning Deck — Funded at 91% of target. The Committee notes this figure reflects low utilisation-driven wear rather than particularly effective saving.

Appendix N — LRA-Approved Contractors, Assessors & Suppliers Directory

The complete Directory is maintained in Volume III. The following excerpt lists contractors most frequently engaged by residents for Structural Approval, Reflectivity Audit, and Craterscaping work.

Firm	Specialty	Notes
Tranquility Surface Systems	Structural Approval filings, general construction	Handles the majority of new Structural Approval submissions; average turnaround matches, but does not beat, the ARC's own 4–6 week estimate.
Regolith & Renn Assessors	Certified albedo assessment	No relation to the Deputy Director of Surface Standards, a point the firm's letterhead now states explicitly following resident inquiries.
Crater Cleanup Cooperative	Craterscaping, Surface Disturbance Permit execution	Community-owned cooperative; also organises the monthly Crater Cleanup Crew event under § 7.2.
Highland Reflective Coatings	Approved Material Palette application	Sole current supplier of Heritage Bronze finish under § 3.8.2.
Sector Alpha Utility Works	Oxygen trunk line, power grid, and relay installation	Holds the Association's primary utility maintenance contract.
Fra Mauro Legal Services (Earth-based)	Collections counsel, Tribunal representation	Retained under § 6.7.1, Stage 4; operates on Earth-standard business hours, communicated to residents as a known limitation.
Descartes Data Relay Partners	Communications relay, Priority Bandwidth provisioning	Administers the tiered service levels described at § 11.6.1.
Taurus-Littrow Insurance Group	Individual Lunar Habitation Policies, contractor liability coverage	Preferred underwriter for the Association's Master Policy at § 13.2.
Ocean of Storms Shelter Systems	Solar flare shelter certification	Certifies shelters under § 10.4.1; maintains the only certification lab currently operating within Association jurisdiction.
The Mediation Room (independent)	Neighbour dispute mediation facilitation	Independent of the Board; engaged under § 14.1 where no Board member is available to facilitate.
Legacy Overlook Guides Collective	Heritage tourism guiding, filming permit logistics	Coordinates with the Legacy Equipment Preservation Subcommittee on all Heritage Filming Permit engagements.
Founders' Crater Pact Historical Society (unofficial)	Informal record-keeping of pre-Charter community history	Not an Association body; the Board has clarified this in writing after residents assumed otherwise.

Firm	Specialty	Notes
Sector Alpha Waste Consolidation Services	Waste collection, Toss Zone boundary marking	Operates the Waste Consolidation Service referenced at § 10.6.1.

Appendix O — Sample Committee Meeting Minutes

Provided as illustrative examples of the Association's record-keeping standard. Full minutes archives are available through a Records Request (§ 15.4).

Architectural Review Committee — Minutes Excerpt

Present: T. Renn (Chair), resident representative, At-Large designee. 1. Reviewed Submission #ARC-2094-0187 (regolith-yard display). Denied; height exceeds § 3.4.2 limit by approximately 10 cm. Resubmission invited. 2. Reviewed Submission #ARC-2094-0191 (Heritage Bronze finish application, property adjacent to Legacy Overlook). Approved without condition. 3. Discussed backlog of 14 pending submissions. Chair noted the Committee remains within its stated 4–6 week turnaround "in aggregate, if not always in the individual case a resident happens to be asking about." 4. Adjourned.

Legacy Equipment Preservation Subcommittee — Minutes Excerpt

Present: P. Anand (Acting Chair), resident historian volunteer. 1. Reviewed Heritage Filming Permit application #HFP-2094-004. Approved, subject to the standard exterior-vantage-point restriction at § 9.9.3. 2. Discussed status of correspondence sent under § 9.5 to operators of three commercial landers. No responses received. Noted for the record and for Appendix H. 3. Revisited the proposal to merge the vacant Keeper of the Dust Drift Ledger seat into Subcommittee membership. Tabled again for lack of a Keeper to consult regarding their own merger. 4. Adjourned.

Appendix P — Frequently Submitted Records Requests

The following questions account for a large share of submissions through the Records Request Portal (§ 15.4). Standard responses are reproduced here so residents may skip the queue where their question is already answered.

Question	Standard Response
Where is the pool?	See the most recent Special Assessment Notice. The Board will update residents if and when the pool is located.
Why is my albedo assessment different from my neighbour's?	Albedo is assessed per-property based on actual surface conditions. Differences are expected and are not, on their own, evidence of unequal enforcement.
Can I speak to the Keeper of the Dust Drift Ledger?	The position is currently vacant. See § 5.1.4.
Why does my correspondence go to spam?	This is a known and, per § 2.1.2, acknowledged condition. It is not a malfunction.
Can I get a copy of Volumes II through XII?	Yes, via Form LRA-905. Estimated response time is longer than for Volume I alone.
Is the Board aware that 'MONS RULE' has appeared again?	Yes. The investigation remains open. See Appendix D.
Why wasn't my agenda item included in the Board meeting?	The Board reviews all submitted items and is under no obligation to include them. See § 5.3.3.
Has NASA (or any other agency) ever responded to Association correspondence?	Not to date. See Appendix H.
Can I remove an old lander from near my property?	No. See § 9.10.1 and the associated fine schedule at Appendix B.
What happened at the Full Moon Party in 2090?	See § 3.4.2, § 7.3.2, and Appendix D. The Board considers the matter closed.

Appendix Q — The Oath Ceremony: Programme & Ratification Record

This Appendix consolidates materials related to the Oath of Lunar Civic Responsibility (§ 2.3) for residents planning to attend an upcoming ceremony, and for the historical record.

Standard Ceremony Programme

6. Welcome and roll call of new residents, conducted by whichever Board member drew the shortest schedule that cycle.
7. Brief remarks from the Director of Community Relations on the meaning of the Oath, delivered from prepared notes that have not been substantially revised since incorporation.
8. Recitation of the Oath of Lunar Civic Responsibility (§ 2.3.3), led by the Chairperson, with new residents repeating each line.
9. Countersignature of the Residency Certificate by no fewer than two Board members.
10. Distribution of Welcome Packets (§ 7.7).
11. Light refreshments, weather (such as it is) permitting.

Ratification History

The original Charter was ratified at a ceremony attended by the earliest registered residents on Lunar Cycle 1, Day 1 of 2088. Subsequent revisions have not required a repeat ratification ceremony; the Board's position, stated at § 16.1, is that amendment by Board vote is sufficient and a new ceremony each time would be, in its own words, "a lot, honestly."

A resident present at the original ratification ceremony remains, as of this printing, the only individual to have signed both the original Charter and every subsequent revision in a personal capacity, having served on the Board continuously since incorporation.

Appendix R — Sample Completed Forms

The following are illustrative examples of correctly completed forms, provided at resident request following repeated Records Request submissions asking, in effect, "what does this actually look like filled out."

Form LRA-VIO-1, Completed Example

*Violation Notice — Form LRA-VIO-1 Property: Lot 0442-B, Sector Alpha
Violation: § 3.2.2, Dust Drift, Tier 1 (0.4m measured migration) Cure Period: 14 days from date of notice Inspector: LRA-Certified Surface Assessor, badge #0091 Notes: Migration traced to unsecured regolith berm on southern boundary. Resident advised to review § 3.6 (Boundary Markers & Fencing) for compliant remediation options.*

Form LRA-COMPLAINT-1, Completed Example

Neighbour Complaint Form — Form LRA-COMPLAINT-1 Complainant: Lot 0198-A Respondent: Lot 0198-B Nature of Complaint: Howling observed at approximately 03:00 UTC, well outside permitted hours under § 4.1.3. Requested Resolution: Standard enforcement per § 6.3.2. Complainant Notes: This is the third such occurrence this quarter. Prior informal conversation attempted per § 14.3 without resolution.

Form LRA-042-A, Completed Example (Excerpt)

*Application for Lunar Residential Admission — Form LRA-042-A (Excerpt)
Applicant: [Name withheld for this specimen] Intended Property: Lot 0561, Sector Alpha, adjacent to Conservation Crater 12 Personal Statement (excerpt):
"...I am aware of the Association's expectations regarding albedo, dust containment, and community participation, and I am prepared to meet them. I have read the table of contents in full and portions of Parts I through VI."
Character References: Three attached, none of whom are also applying for residency at this time, per § 2.1.2.*

Appendix S — Excerpt from Volume X: The Full Moon Party Historical Record

Volume X maintains a complete pictorial and narrative record of every Full Moon Party since incorporation. The following anecdotes are drawn from that record for residents new enough not to have heard them yet.

The inaugural Full Moon Party (2088) was, by all surviving accounts, a modest affair attended by fewer than a dozen residents, held before the seating-chart system existed and therefore before there was any dispute for a seating chart to manage. The Board's minutes from that year describe it simply as "nice."

The 2089 party is remembered, per § 3.4.2 and Appendix D, for the incident that produced the current inflatable-ornament restriction. The 2090 party repeated the pattern closely enough that the Board's minutes that year include the phrase "see last year's minutes," which the Board acknowledges is not, strictly, how minutes are supposed to work.

The 2092 party is remembered less for any rule violation than for an unconfirmed sighting reported near the refreshment table, addressed at Appendix D under that year's entry, and not otherwise elaborated on here, there, or, the Board suspects, anywhere else it can control.

Volume X additionally preserves the complete photographic record of the Full Moon Party seating charts since the practice began, which the Director of Community Relations has described as "a surprisingly effective institutional memory of who is currently not speaking to whom."

Appendix T — Excerpt from Volume XI: Oxygen Credit Exchange Rate History

Set quarterly per § 1.4 (Definitions, "Oxygen Credits"). The following is a selected annual snapshot; full quarterly figures are maintained in Volume XI.

Year	OC per Standard Earth-Currency Unit (indexed)	Note
2088	1.00 (base index)	Set at incorporation.
2089	1.04	Minor adjustment following first full fiscal year.
2090	1.11	Reflects increased dues collection costs.
2091	1.22	Dust Event remediation costs, per Revisions 3–6.
2092	1.19	Slight correction; attributed by the Audit & Finance Committee to "stabilisation," a term it declined to define further.
2093	1.25	Reflects Priority Bandwidth infrastructure investment under § 11.6.
2094	1.31	Current rate as of this printing.

The Board reiterates, as it has every year this table has existed, that the exchange rate has been unfavourable for as long as records have been kept, per § 1.4.

Appendix U — Excerpt from Volume VII: Selected Tribunal Precedent (General)

The complete Tribunal Precedent Digest is maintained in Volume VII. The following general (non-Howling) cases are reproduced here as they are the ones most frequently requested through the Records Request Portal.

Case No. T-2090-008, Resident v. The Board ("the Retroactive Structure Case"). The appellant's temporary greenhouse structure remained in place 34 days, four beyond the 30-day threshold at § 3.3.2, due to a documented equipment delay. The Tribunal held that the retroactive Structural Approval fee still applied notwithstanding the good-faith delay, but recommended, and the Board later adopted, a standing practice of waiving the fee (though not the filing requirement) where a resident can document the cause of delay in advance.

Case No. T-2091-002, Resident v. Resident ("the Crater-Share Liability Case"). Following a Tier 2 dust drift event traced to a jointly-held crater-share property, one co-resident argued they should bear no liability as they had been off-property at the time of the drift. The Tribunal upheld joint-and-several liability per § 2.4.4 regardless of which co-resident was present, noting that the whole point of joint-and-several liability is that presence is not the test.

Case No. T-2093-011, Resident v. The Board ("the Emergency Landing Paperwork Case"). The appellant, having made a documented emergency landing, was fined for late submission of the Post-Arrival Emergency Landing Report (§ 4.2.3), filed on day 51 rather than the required 48 hours. The Tribunal upheld the fine, observing that the emergency itself had concluded well within the reporting window and that the appellant's stated reason for delay ("I was still shaking") was sympathetic but not, under the Charter as written, an exception.

Case No. T-2094-005, Resident v. The Board ("the Directory Opt-Out Case"). The appellant argued that opting out of the Resident Directory under § 2.6.2 should also exempt them from the Good Neighbour introduction expectation at § 14.3. The Tribunal held the two provisions to be unrelated, noting that § 14.3 carries no enforcement mechanism in any case and the appeal was, on some level, moot from the outset.

Appendix V — Sample Annual Meeting Agenda

Provided as an example of the standard agenda format for the Annual HOA Meeting under § 5.3.6.

ANNUAL HOA MEETING — AGENDA 1. Call to order and quorum certification (Nominating Committee) 2. Reading of the prior year's minutes 3. Chairperson's Annual Report 4. Treasurer's Report and budget ratification vote, including review of the current Reserve Study (§ 6.5) 5. Committee reports (Architectural Review, Aesthetic Review, Legacy Equipment Preservation, Craterscaping, Social Events, Grievance & Ethics) 6. Board elections for available seats (§ 5.1.3) 7. Resident Amendment Petitions received this cycle (§ 16.1.2), if any 8. Old business 9. New business 10. Adjournment and refreshments (§ 5.3.6)

Appendix W — Specimen Collections Notices

Provided for residents who wish to understand the collections process at § 6.7 in concrete terms, and who have not yet had reason to receive either notice below.

Specimen: Stage 5 Lien Notice

NOTICE OF LIEN Pursuant to § 6.7.1 of the Lunar Residential Charter, the Moon Homeowners Association hereby records a lien against your property (Lot [XXXX]) in the amount of [balance], reflecting unpaid assessments, late fees, accrued interest, and collection costs as of the date of this notice. This lien will remain in effect until the balance, including any further interest and costs, is paid in full. You retain the right to dispute this determination through mediation under § 14.1 prior to any further action. IMPORTANT NOTICE: IF YOUR PROPERTY IS PLACED IN FORECLOSURE BECAUSE YOU ARE BEHIND ON ASSESSMENTS, IT MAY BE SOLD WITHOUT FURTHER PROCEEDINGS.

Specimen: Foreclosure Warning Notice

NOTICE REGARDING POTENTIAL FORECLOSURE The Association's records indicate your account remains delinquent more than 120 days past due, and a lien has been recorded against your property per the enclosed Stage 5 Notice. The Board wishes to state plainly that foreclosure is a measure of last resort and has been pursued to completion on exactly zero occasions since incorporation. The Board would very much like to keep that number at zero and encourages you to contact the Document Processing Centre to discuss a payment plan under § 6.7.3 before this matter proceeds any further.

Appendix X — Full Text of Selected Board Resolutions

The following resolutions are reproduced in full as they are frequently cited elsewhere in this Charter and residents have asked to see the original text rather than a summary.

Resolution 2089-R-01: Establishing the Howling Ordinance

WHEREAS the Board recognises howling, directed at Earth or the void, as a longstanding community tradition; and WHEREAS the 2089 Full Moon Party demonstrated the need for structured hours; NOW THEREFORE the Board resolves to establish permitted howling hours as set forth in § 4.1.3, effective immediately, and to apply the standard enforcement sequence at § 6.3.2 to violations thereof.

Resolution 2094-R-09: Recognising the Register of Pre-Existing Historic Surface Structures

WHEREAS the Association has, since incorporation, exercised de facto jurisdiction over surface equipment it did not place and cannot remove; and WHEREAS this equipment has, by any fair reading, historical significance exceeding its nuisance value; NOW THEREFORE the Board resolves to formally establish the Register at § 9.2, to extend Grandfathered Non-Conformance status to each catalogued item, and to direct the Legacy Equipment Preservation Subcommittee to maintain the Register going forward.

Resolution 2091-R-14: Establishing the Compliance Rebate Programme

WHEREAS residents have noted, not inaccurately, that this Charter describes considerably more ways to be fined than rewarded; NOW THEREFORE the Board resolves to establish a Compliance Rebate of 20 oxygen credits for any resident maintaining 24 consecutive months of Good Standing, as set forth in § 6.9, and further resolves that this Programme be evaluated, not eliminated, should its cost exceed initial projections.

Appendix Y — Sample New Resident Orientation Quiz

Distributed, optionally, alongside the Welcome Packet (§ 7.7). Completion is not required for residency but is, per the Director of Community Relations, "a nice way to see what actually sank in."

Question	Answer
What is the minimum residential albedo?	12% (§ 3.1.1)
What is the Dust Drift Tolerance Threshold?	0.3 linear metres per lunar day (§ 3.2.2)
Who currently holds the seat of Keeper of the Dust Drift Ledger?	No one. The seat is vacant (§ 5.1.4)
How many inflatable ornaments may a property display?	One (§ 3.4.2)
What happens if you file a knowingly false complaint?	A 150 OC fine (§ 14.2.2, Appendix B)
Is "MONS RULE" a resolved matter?	No (§ 4.5.1, Appendix D)
Where is the community pool?	Unknown (§ 7.1, Appendix M)

New residents scoring seven out of seven on this quiz are, per an informal and entirely unofficial Board tradition, congratulated personally by whichever Board member happens to notice.

Appendix Z — Acknowledgements & Drafting Notes

This revision was prepared by the sitting Board with input from the Legacy Equipment Preservation Subcommittee, the Craterscaping Subcommittee, and a small number of residents who responded to the Board's call for feedback on earlier drafts, a call the Board notes was answered by considerably fewer residents than the Board had hoped and considerably more than the Board had expected given historical response rates to similar requests.

Particular thanks are owed to the resident historian volunteer serving on the Legacy Equipment Preservation Subcommittee, whose independent research substantially informed the site notes at Appendix C, and who has asked that this acknowledgement be as brief as possible, a request the Board has mostly honoured.

The Board also wishes to thank the many residents who, over the life of the prior revision, submitted Records Requests, filed complaints, attended Full Moon Parties, paid their dues on time, and otherwise made the Association something worth writing four thousand two hundred pages about, authorised or otherwise.

Finally, the Board acknowledges the continued absence of the Keeper of the Dust Drift Ledger from this and every prior drafting process, and notes, for whatever it is worth to future historians, that the seat remains held open.

A Closing Case Study

Case No. T-2094-018, Resident v. The Board ("the Revision 9 Comment Period Case"). A resident argued that the public comment period preceding this revision's adoption was too brief to allow meaningful review of eight new Parts. The Tribunal agreed that the timeline was, in its words, "ambitious," but declined to delay adoption, noting that the Charter itself has never claimed to move at a pace convenient to the people bound by it, and that this case may fairly be read as Exhibit A.

Appendix AA — Sample Full Moon Party Programme

Distributed to attendees at check-in, per the Social Events Committee's standard practice, and reproduced here for residents curious what an evening under this Charter's rules actually looks like from the inside.

FULL MOON PARTY — OFFICIAL PROGRAMME 19:30 UTC — Doors open. Attendance log begins (§ 7.3.2). 20:00 UTC — Welcome remarks, Director of Community Relations. 20:15 UTC — Craterscaping Subcommittee garden tour (optional, weather such as it is permitting). 20:45 UTC — Committee reports, abbreviated versions of the Annual Meeting reports for residents who could not attend that meeting. 21:00–21:30 UTC — Designated Howling Window (§ 7.3.2). Standard Howling Ordinance hours do not apply during this window; all other provisions of § 4.1 remain in force. 21:30 UTC — Refreshments continue. Seating chart (§ 7.3.2, prepared by the Director of Community Relations) remains in effect for the duration of the event. 22:30 UTC — Closing remarks, Chairperson. 23:00 UTC — Official conclusion. Attendees remaining past 23:15 UTC are considered to be attending an unauthorised gathering per § 7.3.2.

The Committee notes that the Craterscaping garden tour was added following resident feedback that the 2091 and 2092 programmes were, in the Committee's own self-assessment, "a little heavy on committee reports and light on anything a person would actually enjoy doing with their evening." Attendance at the tour itself remains optional, unlike attendance at the party as a whole.

Residents new to the Full Moon Party are encouraged to review § 7.3 in full before attending, particularly the provisions concerning inflatable ornaments, which the Committee would very much like to stop having to mention by name in this Appendix but does not yet feel able to.

A Note on Attendance Enforcement

The Board wishes to clarify, for residents newer to the Association, that Full Moon Party attendance enforcement under § 7.2.1 has in practice been considerably gentler than the Charter's own language suggests. No resident has, to date, been formally sanctioned solely for missing a Full Moon Party, though the Board reserves the right to change this practice and has left the underlying mandatory-attendance language in place accordingly.

Appendix BB — Excerpt from Volume XII: Footnotes to Footnotes (Consolidated)

Volume XII exists, per § 16.4.1, to collect footnotes referencing other footnotes throughout the full twelve-volume Charter. The following brief excerpt is provided so residents understand what, precisely, they are being asked to take on faith when this Volume cites Volume XII.

Footnote 1 (referenced at § 3.2.3, Vol. I): "See Appendix Q, Vol. IV, n. 14."

Footnote 14 (Appendix Q, Vol. IV): "See Vol. XII, Footnote 1, for the circumstances under which this footnote itself came to be footnoted."

Footnote 1 (Vol. XII, on the above pair): "The Board acknowledges this is circular. The Board considers it circular in a load-bearing way, and has left it as-is across seven revisions rather than resolve it, on the theory that at least one part of this Charter should be honest about what it is doing."

The Board offers this excerpt not because it expects residents to request the complete Volume, but because more than one resident has, over the years, asked whether Volume XII is a joke. It is not. It is, however, the closest thing in this entire Charter to the Board admitting that it knows exactly how this looks.

A Final Cross-Reference

Residents who have followed the footnote chain this far are, per the Board's own informal tally, now qualified to help staff the Document Processing Centre, a role for which the Board notes there is presently an opening, the front office hours having still not been updated since before most current residents arrived (§ 7.1, § 7.7.2). Interested residents may apply through the general Committee Volunteer Interest Form (LRA-695).

This concludes the substantive content of Volume I. Appendix F follows, for residents who have not yet reached it, and who the Board suspects are, by now, exactly the residents this whole exercise was for.

Appendix CC — Quick Reference: Most-Cited Sections

For residents who would rather bookmark a handful of Sections than read the Cross-Reference Index at Appendix K in full, the following table lists the ten most frequently cited Sections in Association correspondence over the life of the prior revision.

Rank	Section	Subject
1	§ 3.2	Dust Containment & Drift Liability
2	§ 4.1	Noise Ordinance & Howling Regulations
3	§ 3.1	Albedo Compliance
4	§ 6.2 / Appendix B	Schedule of Fines
5	§ 6.3	Enforcement Procedures
6	§ 3.4	Lawn Ornaments & Exterior Decoration
7	§ 9.5	Correspondence with Pre-Association Entities
8	§ 5.4	Appeals & the Tribunal
9	§ 2.4	Transfer, Subletting & Crater-Share Arrangements
10	§ 7.3	The Full Moon Party

The Board notes that § 9.5 (correspondence with Pre-Association Entities) is a new entrant to this list, appearing only since the Register was formally recognised under this revision. The Board considers this a sign that Part IX resonated with residents, rather than a sign that residents simply enjoy reading about our correspondence with people who do not write back.

The Board additionally notes that this ranking is drawn from internal correspondence logs only and does not reflect Records Request volume, which, per Appendix P, remains dominated by a single question about a missing pool.

A final note on methodology: this ranking excludes Part I, on the theory that every Section of Part I is, definitionally, foundational, and ranking them against Part IX correspondence volume struck the Board as comparing categories that do not compare cleanly. Residents who disagree with this methodological choice are welcome to raise it with the Audit & Finance Committee, which compiled this ranking and would, frankly, welcome the diversion.

Appendix DD — A Word on Volume II Through XII

Residents occasionally ask why the Association maintains eleven additional Volumes rather than simply incorporating everything into this one. The honest answer, per internal Board discussion during the drafting of this revision, is a combination of genuine practical necessity (Appendix Q alone runs 847 pages) and a certain institutional attachment to the bit, which the Board is not going to pretend it does not enjoy at least a little.

Volume II (Howling Ordinance Jurisprudence) and Volume VII (Tribunal Precedent Digest) are, in practice, the most frequently requested of the eleven, and this revision's expanded excerpts at Appendices L and U reflect that demand directly. Volume IV (the Dust Drift Liability Matrix) remains, by contrast, the least requested Volume in Association history, a fact the Board attributes to its length rather than any lack of resident interest in dust drift as a subject.

Volume III (the Approved Contractors, Assessors & Suppliers Directory) is updated continuously rather than on a revision cycle, and residents seeking the most current listing should request it directly rather than rely on the excerpt at Appendix N, which reflects only firms active as of this printing.

The Board has, on occasion, discussed consolidating all twelve Volumes into a single document. The discussion has never proceeded past that stage, for reasons the Board suspects residents who have read this far will find entirely unsurprising.

This Volume, at last count, comfortably exceeds the one-hundred-page threshold the Board set for this revision at the outset of drafting. The Board considers this an accomplishment. The Board is aware that not everyone will.

Appendix F — For Residents Who Read This Far

If you have reached this page, you are, by the Board's own estimate, in a minority small enough to be statistically interesting. A few notes, off the record:

- The coordinates in Appendix C are real. All of them, where given precisely. The Board will not confirm why this mattered enough to get right.
- The discrepancy in Appendix B was noted, in this Charter, by the Board itself. Residents who report it through the Records Request Portal (§ 15.4) should not expect a different answer than the one already printed above.
- The numbers logged in Appendix D against the year 2092 have not been explained anywhere in this document. Residents are free to draw their own conclusions. The Board will neither confirm nor deny any conclusion drawn.
- "MONS RULE" remains under investigation. It has remained under investigation for some time. The Board considers the investigation active in the same sense that several other things in this Charter are technically ongoing.

The Board thanks you for your compliance. The Board thanks you, additionally and separately, for reading the footnotes.
